

História Ciências Saúde MANGUINHOS

**A journal devoted to
the history of the
sciences and of health**

Published by the Oswaldo Cruz Foundation's Casa de Oswaldo Cruz, **História, Ciências, Saúde – Manguinhos** is a quarterly journal that features original articles in Portuguese, English, and Spanish, as approved by its Editorial Board and in ad hoc peer reviewers. Its departments include original articles and essays, research notes, documents pertinent to historical studies, images, interviews, debates, and book and film reviews. In addition to its four regular issues, it puts out at least one thematic supplement a year. The journal is ranked **A1 in the area of history by Capes' Qualis System**, which evaluates graduate courses and scientific journals. Its general profile can be summed up by the triad "history – sciences – health."

While the life sciences are the journal's first priority, it also welcomes contributions to the history of other sciences and social history research that enhance our understanding of processes related to the sciences and health.
