## SPOTLIGHT

*Adapting to Win: How Insurgents Fight and Defeat Foreign States in War*  
Noriyuki Katagiri  
University of Pennsylvania Press

*Adapting to Win* examines almost 150 instances of violent insurgencies pitted against state powers, including in-depth case studies of the war in Afghanistan and the 2003 Iraq war. By applying sequencing theory, Katagiri provides insights into guerrilla operations ranging from Somalia to Benin and Indochina, demonstrating how some insurgents learn and change in response to shifting circumstances. Ultimately, his research shows that successful insurgent groups have evolved into mature armed forces, and then demonstrates what evolutionary paths are likely to be successful or unsuccessful for those organizations. *Adapting to Win* will interest scholars of international relations, security studies, and third world politics and contains implications for government officials, military officers, and strategic thinkers around the globe as they grapple with how to cope with tenacious and violent insurgent organizations.

Noriyuki Katagiri teaches in the Department of International Security Studies at Air War College, United States Air Force, Maxwell Air Force Base.
