**WEYBRIDGE,**  
SURREY.

# ARMSTRONG SIDDELEY Aircraft Engines

## The "JAGUAR"

350 h.p. 14-Cylinder Air-cooled.

THIS engine represents the highest point yet reached in the development of the air-cooled aero engine. The design has been the subject of searching tests both on the brake and in flight.

The following is the guaranteed minimum performance:—

At Normal speed 1,600 r.p.m., 350 b.h.p.

Petrol Consumption, .55 pts. / b.h.p.

.312 litres per b.h.p. hour.

Oil Consumption, .03 pts. / b.h.p.

.017 litres per b.h.p. hour.

Weight, complete, 760 lbs. 346 kgs.

## The "LYNX"

180 h.p. 7-Cylinder Air-cooled.

THE "LYNX" is an ideal engine for Training Aircraft. It is most accessible—being superior in this respect to any other aircraft engine. Fuel consumption is very low and construction very simple.

ARMSTRONG SIDDELEY MOTORS  
LIMITED.

(Allied with Sir W. G. Armstrong Whitworth & Co.,  
Ltd.)

WORKS & AERODROME: COVENTRY.  
LONDON: 10, OLD BOND STREET, W.1.

### AERONAUTICAL PUBLICATIONS.

#### THE JOURNAL OF THE ROYAL AERONAUTICAL SOCIETY.

The Official Organ of the Royal Aeronautical Society, containing original articles and Full Reports of all Papers read before the Members, together with the Discussions thereon. Annual Subscription: £1 12s. 6d., post free, Home or Abroad.

#### ANNUAL REPORTS OF THE AERONAUTICAL SOCIETY.

These Reports, which were issued annually from 1866-1897, when they were replaced by THE AERONAUTICAL JOURNAL, form a complete record of the pioneer work that was done during that period, and are of great historical interest and value. As many of these volumes are now extremely rare, special prices will be forwarded on application.
