Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 22, 2019 (18 issues):
Internet/print package: £1325/\$2542 Americas only/€2124 EU only
Internet only: £959/\$1820 Americas only/€1525 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

List of Reviewers

PHN List of Reviewers 3299

Monitoring and surveillance

Changes in nutrient and food group intakes among children and women participating in the Special Supplemental Nutrition Program for Women, Infants, and Children: findings from the 2005–2008 and 2011–2014 National Health and Nutrition Examination Surveys
Meghan C Zimmer and Jacqueline A Vernarelli 3309

Assessment and methodology

How to use replicate weights in health survey analysis using the National Nutrition and Physical Activity Survey as an example
Carole L Birrell, David G Steel, Marijka J Batterham and Ankur Arya 3315

Extended composite index of anthropometric failure in Argentinean preschool and school children
IF Bejarano, EE Oyhenart, MF Torres, MF Cesani, M Garraza, B Navazo, ML Zonta, MA Luis, FA Quintero, JE Dipierri, E Alfaro, EM Román, R Carrillo, S Dahinten, DB Lomaglio, N Menecier and MD Marrodán 3327

Nutrition communication

Confusion and nutritional backlash from news media exposure to contradictory information about carbohydrates and dietary fats
Danielle Clark, Rebekah H Nagler and Jeff Niederdeppe 3336

Promoting meal planning through mass media: awareness of a nutrition campaign among Canadian parents
Melissa Anne Fernandez, Sophie Desroches, Marie Marquis, Alexandre Lebel, Mylène Turcotte and Véronique Provencher 3349

Behavioural nutrition

Children's Eating Behaviour Questionnaire: association with BMI in children aged 3–10 years from Bosnia and Herzegovina
Razija Spahić and Nurka Pranjić 3360

Association between hours worked in paid employment and diet quality, frequency of eating out and consuming takeaways in the UK
Lucy Sam, Tony Craig, Graham W Horgan and Jennie I Macdiarmid 3368

Nutritional epidemiology

Dietary patterns and metabolic phenotypes in Brazilian adults: a population-based cross-sectional study
Dayana LM Pereira, Leidjaira L Juvanhol, Daniele CG Silva and Giana Z Longo 3377

Dietary patterns and metabolic phenotypes in Brazilian adults: a population-based cross-sectional study – ERRATUM
Dayana LM Pereira, Leidjaira L Juvanhol, Danielle CG Silva and Giana Z Longo 3384

Dietary quality, as measured by the Alternative Healthy Eating Index for Pregnancy (AHEI-P), in couples planning their first pregnancy
Pao Ying Hsiao, June L Fung, Diane C Mitchell, Terry J Hartman and Marlene B Goldman 3385

Economics and environment

Is neighbourhood social deprivation in a Brazilian city associated with the availability, variety, quality and price of food in supermarkets?
Maria Alvim Leite, Máira Macário de Assis, Ariene Silva do Carmo, Bruna Vieira de Lima Costa, Rafael Moreira Claro, Inês Rugani de Castro, Leticia de Oliveira Cardoso, Michele Pereira Netto and Larissa Loures Mendes 3395

Community nutrition

Feasibility of a farm-to-WIC intervention
Jennifer Di Noia, Dorothy Monica, Alla Sikorskii, Karinna Gonzalez and Lina Abuhadba 3405

Interventions

Predicting potential to benefit from an iron intervention: a randomized controlled trial of double-fortified salt in female Indian tea pluckers
Julie EH Nevins, Sudha Venkatramanan, Saurabh Mehta and Jere D Haas 3416

Public policies

Folic acid deficiency declined substantially after introduction of the mandatory fortification programme in Queensland, Australia: a secondary health data analysis
Anna Slagman, Linton Harriss, Sandra Campbell, Reinhold Muller and Robyn McDermott 3426

Analysing the policy space for the promotion of healthy, sustainable edible oil consumption in India
Soledad Cuevas, Shauna M Downs, Suparna Ghosh-Jerath, Aafrin and Bhavani Shankar 3435

Review Article

The food environment in Latin America: a systematic review with a focus on environments relevant to obesity and related chronic diseases
Carolina Pérez-Ferrer, Amy H Auchincloss, Mariana Carvalho de Menezes, Maria F Kroker-Lobos, Leticia de Oliveira Cardoso and Tonatiuh Barrientos-Gutierrez 3447

Systematic review and meta-analysis of the effect of iron-fortified flour on iron status of populations worldwide
Jila Sadighi, Saharnaz Nedjat and Rahele Rostami 3465

Corrigendum

A healthy, sustainable and safe food system: examining the perceptions and role of the Australian policy actor using a Delphi survey – CORRIGENDUM
Sinead Boylan, Emma Sainsbury, Anne-Marie Thow, Christopher Degeling, Luke Craven, Darryl Stellmach, Timothy P Gill and Ying Zhang 3485

Effect of routine iron–folic acid supplementation among rural pregnant women living in low- and high-groundwater-iron areas in Bangladesh – CORRIGENDUM
Faruk Ahmed, Moududur Rahman Khan, Ireen Akhtar Chowdhury, Rubhana Raqib, Anjan Kumar Roy and Rafiqul Chowdhury 3486

Erratum

Letter to the Editor – ERRATUM
Gill Thomson, Fiona Dykes, Andy Bilson, Jane Putsey, Mary Whitmore and Sally Dickens 3489
