# ROYAL AERONAUTICAL SOCIETY

## SITUATIONS VACANT AND WANTED

From time to time paid advertisements for posts in the Industry and in official establishments have been published in the "Secretary's News Letter" (formerly "Monthly Notices") of the Society, which accompanies the JOURNAL each month. In order to avoid any misunderstanding it has been decided that instead this page of the JOURNAL should be used for advertisements of situations vacant in the Industry, the Ministries, Universities and Colleges, and for situations wanted.

To begin with the charge for such advertisements will be £5 0s. 0d. for each insertion up to 2 in. in depth.

---

ENGINEERS, MATHEMATICIANS or PHYSICISTS are invited by the MINISTRY OF SUPPLY to apply for an appointment in the grade of SENIOR SCIENTIFIC OFFICER at an Experimental Aircraft Establishment in Southern England, for research work in connection with aircraft flight testing. Candidates must have a 1st or 2nd class honours degree or equivalent qualification with a knowledge of aerodynamics or fluid mechanics. They must be at least 26 years of age and have had a minimum of 3 years' post-graduate research experience. Some industrial experience is also desirable. Salary will be determined on age and on an assessment of the successful candidate's qualifications and experience within the range of £720 to £910. Rates for women somewhat lower. Post is unestablished and carries benefits of F.S.S.U. Application forms obtainable from Ministry of Labour and National Service, Technical and Scientific Register (K), York House, Kingsway, London, W.C.2, quoting A221/51/A. Closing date 22nd September, 1951.

---

**The Journal is published monthly at the Offices of the Society, 4 Hamilton Place, Piccadilly, London, W.1.** None of the papers or paragraphs must be taken as expressing the opinion of the Council of The Royal Aeronautical Society unless such is definitely stated to be the case. Subscriptions per annum, £6 3s. 0d., including postage: Single Numbers, 10s., or 10s. 3d. post free. All communications for publication or Advertisements in the Journal should be addressed to The Editor, and on general matters affecting the Society to The Secretary, 4 Hamilton Place, W.1. The Society's Bankers are Messrs. Coutts & Co.

Telephone: Grosvenor 3515 (5 lines). Telegraphic Address: Didaskalos, Audley, London.

# GRAVINER MAGNETIC FIRE DETECTOR

Patent applied for

(RESETTING TYPE) THE COMPLETE SYSTEM COMPRISES A  
DETECTOR - weight only  $2\frac{1}{2}$ ozs - A WARNING LAMP & BATTERY

The operation of the Graviner Magnetic Fire Detector is based on the Curie point principle whereby certain metals lose their magnetic properties on reaching certain temperatures. The adoption of this principle in fire detection is primarily advantageous in that no relays or valve amplifiers are required. The alloy of the

temperature sensing element governs the operating temperature and this figure cannot alter in service. The detector is robust, hermetically sealed, unaffected by "g" or vibration and can be installed in fire zones with ambient air temperatures as high as 290 C. Detection time in standard flame under two seconds.

In the left illustration the top magnet on the beam assembly is attracted to the Curie cap, but its attraction ceases when a pre-determined temperature is reached, and the two bottom magnets swing the beam assembly to the position shown in the right hand illustration, completing an electrical circuit. When the temperature of the sensing element is reduced, the magnetic attraction between the Curie cap and the top magnet is restored, the beam is swung to its original position and the circuit is broken.

Visit our **STAND No. 146** at the **S.B.A.C Exhibition, Farnborough**

## GRAVINER

THE GRAVINER MANUFACTURING CO. LTD., POYLE MILL WORKS, COLNBROOK, BUCKS.
