The World Association for Disaster and Emergency Medicine,
and the Nordic Society for Disaster Medicine now present:

Health Disaster Management Guidelines for Evaluation and Research in the Utstein Style

Editors: Knut Ole Sundnes, MD
Professor Marvin Birnbaum, MD, PhD

Available for \$49.95, or free with a subscription to *Prehospital and Disaster Medicine*, this important work provides a conceptual framework for reporting disaster responses and evaluation, and includes a comprehensive glossary of terms.

For ordering or subscription information, call 01 608-263-2069, email a request to pdm@medicine.wisc.edu, or fax a subscription insert found in each issue of the journal to 01 608-265-3037.

All royalties go to the support of the development of evaluation and research for
Disaster Medicine

Disaster Nursing and Emergency Preparedness for Chemical, Biological, and Radiological Terrorism and Other Hazards
Second Edition

Tener Goodwin Veenema, PhD, MPH, MS, Editor

Praise for the first edition:

"This textbook is a gold mine of state-of-the-art knowledge and information concerning disasters as a threat to public health. Most impressive are the extensive learning resources made available to the reader. Each chapter begins with key messages, Learning objectives, and Overview and ends with a summary, study questions, Internet activities, references and additional readings The textbook is so resourceful that it serves as a station for independent learning and readers may in fact earn continuing education contact hours through the University of Rochester School of Nursing....This text now needs to make its way into the curricula of nursing education."

—**LeaRea Galarowicz**, MS, RN, BC, Clinical Professor and Outreach Program Coordinator,
University of Wisconsin-Madison, Continuing Nursing Education, Madison, Wisconsin

Disaster planning and emergency preparedness have never been more critical to the nurses who serve as our front-line response. Today's pandemic threats of global terrorism, disease, and natural disasters make this comprehensive handbook of best practices a necessity--meeting the need for a nursing workforce that is adequately prepared to respond to any disaster or public health emergency.

In addition to a thorough update based on the most recent recommendations, this second edition contains six new chapters:

- Emergency Health Services (EMS and other first responders)
- Burn Assessment and Management
- Explosive & Traumatic Terrorism
- Caring for High-Risk, High-Vulnerability Patients
- Emerging Infectious Disease (avian and other flu pandemics)
- Chemical Decontamination

All content reflects the guidelines provided in the Federal Disaster Response Plan and the National Incident Management System (NIMS) and therapeutic recommendations from the national Centers for Disease Control and Prevention.

Disaster Nursing will prepare any nurse or EMS team to provide health care under a variety of disaster conditions.

The Best Reason to Visit Victoria, Canada

10 other good reasons to visit Victoria:

1. In 2005 Vancouver Island was voted the sixth best island in the world
2. Victoria has breathtaking natural beauty coupled with a rich cultural history
3. Enjoy world class hotels and restaurants with our renowned friendly Canadian service
4. Victoria boasts internationally renowned salmon fishing, whale watching, sailing, hiking, and so much more
5. National Geographic Magazine has recognized Vancouver Island as one of the best cold water diving destinations in the world
6. Victoria has the mildest climate in Canada, average temperature in May is 16°C
7. Victoria is a 15 minute flight or short ferry ride to Vancouver, site of the 2010 Olympic Winter Games
8. Enjoy the wild beauty of the Pacific coast by booking a cruise to Alaska after your congress
9. Victoria offers a truly remarkable experience and escape from the rushed world
10. Vancouver Island has been named "Best North American Island" for the past 7 consecutive years by Condé Nast Traveler Readers.

The Fairmont Empress Hotel is the WCDEM 2009 host hotel.

The Fairmont Empress Hotel is attached to the Victoria Conference Centre, the location of the 2009 WCDEM Congress.

Bringing Simulation to Life

SimMan®

There is a growing awareness that health care is behind other high risk operations in its attention to ensuring basic safety and that there is a need to grasp the scale of the problem (1,2).

Use of patient simulation is considered an important part of the solution as many scenarios can be presented including uncommon but critical situations where a rapid response is needed. Errors can be allowed to occur and reach their conclusion without any risk to a patient. Team member interactions and leadership can also be explored and developed.

Two manikin-based simulators from Laerdal, SimMan® and AirMan®, represent a new generation of affordable and portable solutions to meet these needs.
