

Euripides and Dionysus

R. P. WINNINGTON-INGRAM

A full-length interpretation of the *Bacchae* of Euripides, the first in English for many years. After a discussion of the various conflicting views already put forward the author proceeds to argue his case for a new view of the significance which Euripides attached to Dionysus and its bearing on the understanding of the play. 15s. net

The Lyric Metres of Greek Drama

A. M. DALE

An important contribution to scholarship in a field previously little explored by English scholars. Miss Dale's book begins with an introduction and a chapter on classification and terminology and closes with chapters on strophic construction and performance. Nine intervening chapters deal in detail with the various types of metre which are also classified in a synopsis. 18s. net

The Style of Aeschylus

F. R. EARP

Using the same methods as those employed in his earlier study of *The Style of Sophocles*, Mr Earp deals with certain aspects of the work and style of Aeschylus and the light they throw on the mind and purpose of the writer. 12s. 6d. net

CAMBRIDGE UNIVERSITY PRESS

STUDIES IN ANCIENT GREEK SOCIETY

THE PRE-HISTORIC AEGEAN

George Thomson

This volume is planned as the first of several with the aim of consolidating the ground covered in *Aeschylus and Athens*. It is in effect an expansion of the first five chapters of that work, reinforcing the argument and treating at length some fundamental problems that were only touched on there, especially matriarchy, land-tenure, Aegean pre-history, and epic. Its range coincides approximately with the Bronze Age, except that the evolution of epic is followed down to its culmination in the sixth century B.C.

800 pp.

85 Illustrations.

SOME PRESS OPINIONS OF *AESCHYLUS AND ATHENS*

"It is a serious and carefully elaborate work of scholarship which needs careful and prolonged examination . . . a pioneer work of great importance."

—Professor T. B. L. Webster in the *MANCHESTER GUARDIAN*.

"In support of his contention that 'possibilities of further research in classical studies are limitless', Professor Thomson might justly point to the long list of occasional contributions with which he has enriched his main argument . . . There is nothing, even where his own convictions are most directly involved, that is not stated fairly and moderately, and with sufficient historical illustration. His book is a notable example of the contribution which modern anthropological studies have to make to traditional learning, if the learned are willing to take account of them."

—Sir John L. Myres in *MAN*.
