JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800020195 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge, CB3 9EW England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, *U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M*13 9*PL, England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92037, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

For permission to reproduce material from *Journal of Plasma Physics*, please apply to the London or New York office of the Cambridge University Press.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A. is authorized to supply single copies of separate articles for private use only.

JOURNAL OF PLASMA PHYSICS is published once every two months in February, April, June, August, October and December, by Cambridge University Press, P.O. Box 92, London NW1 2DB and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) Volume 15 and 16 (1976) is £23.00 net (US $75.00 in the U.S.A. and Canada). single parts cost £11.00 net (US $30.00 in the U.S.A. and Canada) plus postage.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y.

CONTENTS TO VOLUME 16

PART 1 AUGUST 1976

Inelastic collision integral approximation of the Boltzmann equation. PIERRE SÉGUR and JOËLLE LEROUVILLOIS-GAILLARD *page* 1

Linear stability analysis of a class of solutions of the filament model for a stationary field electron ring accelerator. TECHIEN CHEN and J. B. EHRMAN 17

Enhanced fluctuations in a magnetized plasma due to the presence of an electromagnetic wave. J. LARSSON, L. STENFLO and R. TEGEBACK 37

Kinetic theory of surface wave propagation along a hot plasma column. V. ATANASSOV, I. ZHELYAZKOV, A. SHIVAROVA and ZH. GENCHEV 47

Nonlinear development of the ion-cyclotron electromagnetic instability. S. CUPERMAN, A. STERNLIEB and D. J. WILLIAMS 57

Electromagnetic instabilities in high-β anti-loss-cone plasmas. B. BUTI 73

Shock wave focusing by curved walls and staging of beam induced thermonuclear microexplosions. F. WINTERBERG 81

Non-linear resonant interaction of three longitudinal waves in a magnetized plasma. K. P. DAS and D. BANERJEE 95

PART 2 OCTOBER 1976

Nonlinear oscillations in warm plasmas with initial velocity perturbations. S. CUPERMAN and M. MOND *page* 103

Macroscopic plasmadynamical modes in a complete two-fluid description. R. BALESCU and I. PAIVA-VERETENNICOFF 119

Kinetic theory of the evolution of collective plasma excitations in an external electric field. R. BALESCU and I. PAIVA-VERETENNICOFF 129

Energetic ion distribution resulting from neutral beam injection in tokamaks. J. D. GAFFEY, Jr. 149

Instability of energetic ion beam injection in tokamaks. J. D. GAFFEY, Jr. 171

High-beta turbulence in two-dimensional magneto-hydrodynamics. D. FYFE and D. MONTGOMERY 181

Anomalous transport due to long-lived fluctuations in plasma. Part 1. A general formalism for two-time fluctuations. J. A. KROMMES and C. OBERMAN 193

Anomalous transport due to long-lived fluctuations in plasma. Part 2. Hydrodynamic contributions to transport in two-dimensional, strongly magnetized systems. J. A. KROMMES and C. OBERMAN 229

https://doi.org/10.1017/S0022377800020195 Published online by Cambridge University Press

PART 3 DECEMBER 1976

On the stability of the screw pinch in the CGL model. K. M. SRIVASTAVA and F. WAELBROECK *page* 261

Stabilization of Rayleigh–Taylor growth by thermal conduction. K. A. BRUECKNER and S. JORNA 285

Statistical mechanics of transport coefficients. G. VASU 289

Statistical theory of frequency dependent transport coefficients. Part 1. A two-fluid plasma in magnetic field. G. VASU 299

On the modulation instability of hydromagnetic waves parallel to the magnetic field. E. MJØLHUS 321

Explosive instabilities in a cold beam plasma system. R. A. KERST and M. RAETHER 335

Modification of a turbulent spectrum through the injection of a monochromatic wave. Part 1. The evolution equation. A. L. BRINCA 353

The $m = 1$ motion of a screw pinch measured by external probes. A. POCHELON and R. KELLER 363

Purely growing parametric instabilities in plasmas at near critical densities. E. S. CASSEDY 371

The electromotive force generated by driven plasma motions. C. G. GIMBLETT and D. W. ALLAN 389

A general dispersion relation for non-uniform magnetized plasmas. W. ALLAN 399

Ray tracing in weakly nonlinear moving media. D. CENSOR 415

The zero-mode instability: a new parametric decay instability of a plasma in an external field. R. BALESCU and I. PAIVA-VERETENNICOFF 427

Nonlinear coupling of polarized plasma waves. Y. INOUE 439

INDEX TO VOLUME 16 461
