THE SELF-MILKING COW AND THE BLEEDING LINGAM

Criss-cross of Motifs in Indian Temple Legends

1987. XXIV, 254 pages, 8 plates, Pb. DM 84,-

The novel polythetic-prototype approach to myth, legend and other folk narrative proposed in the book, contrary to all major current theories on the subject, denies the existence of constants and accounts for resemblances among tales without recourse to hidden features. The first part demonstrates that the "cycle" of more than 450 related temple legends examined has no objectively given nucleus of motifs, sequence of functions, boundary and invariant structure. The second part deals with centres of gravity in the corpus which are partly culture-specific and partly culture-free. The former include Śiva, the sacred cow, the cobra, the anthill and the rite of anointing the idol. The latter comprise certain motifs as well as favourite colours, numbers and structural elements, which Indian temple legends share with collective tales elsewhere.

## State and Scholars in T'ang China

**D. L. McMULLEN**

Dr McMullen studies the main academic agencies of the T'ang dynasty in China (AD 618–906) and shows how they provided the context for much of the scholarly writing that survives from the dynasty, and how the attitudes of the intellectual elite towards them changed in the three centuries of T'ang rule.

## Searches for an Imaginary Kingdom

The Legend of the Kingdom of Prester John

**L. N. GUMILEV**

Translated by **R. E. F. SMITH**

Ranging widely in subject-matter, space and time, this book interweaves Christian history, and ecological, demographic, social and economic history, with the politics, religions and literature of the vast and varied area between European Russia and China from c. 800 to 1300. The author's bold synthesis fills in many of the missing links between the histories of Europe and medieval China and makes it possible to think of these vast areas as, in some senses, parts of a greater whole.

## The Military Revolution

Military Innovation and the Rise of the West, 1500–1800

**GEOFFREY PARKER**

This attractively illustrated book by a leading historian of early modern Europe explains how the West, so small and so deficient in natural resources in 1500, had by 1800 come to control over one-third of the world. He argues that major changes in military practice amounted to a 'military revolution' which gave Westerners a decided advantage over the people of other continents.
