
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 70, 2017, which includes print and electronic access, is £604 (USA, Canada and Mexico US \$1092) and includes delivery by air; single parts are available at £110 (USA, Canada and Mexico US \$197) plus postage. The electronic-only price available to institutional subscribers is £468 (USA, Canada and Mexico US \$854). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. The *Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

THE JOURNAL OF NAVIGATION

VOLUME 70 NUMBER 1 JANUARY 2017

CONTENTS

- Towards a Cognitive Model of Human Mobility: An Investigation of Tactile Perception for use in Mobility Devices** 1
E. Pissaloux, R. Velazquez, M. Hersh and G. Uzan
- Autonomous Navigation of Mars Probes by Single X-ray Pulsar Measurement and Optical Data of Viewing Martian Moons** 18
Pengbin Ma, Tianshu Wang, Fanghua Jiang, Junshan Mu and Hexi Baoyin
- GNSS Jamming Resilience for Close to Shore Navigation in the Northern Sea** 33
Oeystein Glomsvoll and Lukasz K Bonenberg
- Evaluation of the Capability of Automatic Dependent Surveillance Broadcast to Meet the Requirements of Future Airborne Surveillance Applications** 49
Busyairah Syd Ali, Wolfgang Schuster and Washington Yotto Ochieng
- Mapping Global Shipping Density from AIS Data** 67
Lin Wu, Yongjun Xu, Qi Wang, Fei Wang and Zhiwei Xu
- Terrain Matching Positioning Method Based on Node Multi-information Fusion** 82
Ye Li, Rupeng Wang, Pengyun Chen, Peng Shen and Yanqing Jiang
- Neumann-Hoffman Code Evasion and Stripping Method For BeiDou Software-defined Receiver** 101
Qian Meng, Jian-ye Liu, Qing-hua Zeng, Shao-jun Feng and Rui-zhi Chen
- A DSRC Doppler/IMU/GNSS Tightly-coupled Cooperative Positioning Method for Relative Positioning in VANETs** 120
Feng Shen, Joon Wayn Cheong and Andrew G. Dempster
- Robust Adaptive Kalman Filtering – a method based on quasi-accurate detection and plant noise variance–covariance matrix tuning** 137
Xiaowen Luo and Haitao Wang
- Adaptive Sliding Mode Control for Depth Trajectory Tracking of Remotely Operated Vehicle with Thruster Nonlinearity** 149
Zhenzhong Chu, Daqi Zhu, Simon X. Yang and Gene Eu Jan
- Strapdown Inertial Navigation Algorithms Based on Lie Group** 165
Jun Mao, Junxiang Lian and Xiaoping Hu
- Backstepping Based Adaptive Region Tracking Fault Tolerant Control for Autonomous Underwater Vehicles** 184
Mingjun Zhang, Xing Liu and Fei Wang
- Adaptive Predictive Variable Structure Filter for Attitude Synchronization Estimation** 205
Lu Cao, Junqiang Li, Lei Han and Hengnian Li
