BJHS Themes

Published for the British Society for the History of Science

A new peer-reviewed, open access, thematic journal for the history of science

Editor

Jon Agar, *University College London, UK*

BJHS Themes is a collaborative venture between the British Society for the History of Science and Cambridge University Press aimed at establishing the first fully open access journal for the history of science community. It aims to publish open access, high-quality, scholarly, engaging collections of history of science papers, which address provocative themes, and which will be free for readers and offer no financial barrier to publication for authors. Like its sister publication, *British Journal for the History of Science*, *BJHS Themes* is a journal of the British Society for the History of Science, a major learned society for its subject.

The 1st volume will be '*Intersections: Science and Technology in Twentieth Century China and India*', a focus on a history of science and technology in China and India, which will be convened by historians Jahnvi Phalkey and Tong Lam. It will be published in early 2016.
