

The following papers have been accepted for publication and will appear shortly:

MORRIS, G. R. A differential equation for undamped forced non-linear oscillations. II.

MORAN, P. A. P. The distribution of gene frequency in a bisexual diploid population.

MORAN, P. A. P. The effect of selection in a haploid genetic population.

LONGUET-HIGGINS, M. S. The statistical distribution of the curvature of a random Gaussian surface.

KODIS, R. F. Variational principles in high-frequency scattering.

HOWELL, K. M. Recurrence relations for oscillator-well radial integrals.

POLKINGHORNE, J. C. A note on the relation between scattering phase and bound states.

MILLAR, R. F. Diffraction by a wide slit and complementary strip.

MACDONALD, I. G. Some enumerative formulae for algebraic curves.

FISHER, M. E. and FULLER, A. T. On the stabilization of matrices and the convergence of linear iterative processes.

SILVERMAN, R. A. Scattering of plane waves by locally homogeneous dielectric noise.

## CONTENTS OF BIOLOGICAL REVIEWS

Vol. 33, No. 3. August 1958

THE LATE O. W. TIEGS and S. M. MANTON. The evolution of the Arthropoda.

G. CHAPMAN. The hydrostatic skeleton of the invertebrates.

LORD ROTHSCHILD. Fertilization in fish and lampreys.

# CONTENTS

	PAGE
ROSE, ALAN. Many-valued logical machines . . . . .	307
MACBEATH, A. M. and ROGERS, C. A. A modified form of Siegel's mean value theorem. II	322
BLACKBURN, N. On prime-power groups with two generators . . . . .	327
PATTERSON, E. M. On certain types of derivations . . . . .	338
HAYES, CHARLES A., JR. A sufficient condition for the differentiation of certain classes of set functions . . . . .	346
PETERSEN, G. M. Norms of summation methods . . . . .	354
MILLER, J. B. Series expansions and general transforms . . . . .	358
AKUTOWICZ, EDWIN J. The spectral resolution of Watson transforms . . . . .	368
TAYLOR, J. G. A theorem of continuation for functions of several complex variables . . . . .	377
GARSTANG, R. H. Further computations of quadrupole line strengths . . . . .	383
HELLIWELL, J. B. An application of the Weber-Orr transform to the problem of transonic flow past a finite wedge in a channel . . . . .	391
 RESEARCH NOTE:	
ZEEMAN, E. C. A note on a theorem by Armand Borel . . . . .	396

*Printed in Great Britain at the University Press, Cambridge  
(Brooke Crutchley, University Printer)*
