

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

OLIVER & BOYD LTD.
EDINBURGH AND LONDON

JANUARY 1965

VOL. 7 PART 1

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Animal Production publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made. *Contributions* may be in the field of animal production, or in any related scientific field. Reports on techniques will be published only as appendices to scientific papers. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. *Notes* are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Manuscripts should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. *Two* copies of the typescript (one of illustrations) should be sent to

Dr. Gerald Wiener,
A.R.C. Animal Breeding Research Organisation,
West Mains Road, Edinburgh 9.

Manuscripts are not returned with proofs; authors should therefore retain copies.

Illustrations (figures and plates) should be simple and few, otherwise a charge may have to be made to authors. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil. Costs of touching-up diagrams found to be incomplete or unsuitable for line-block reproduction will be charged to authors.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors. Part of their cost may have to be borne by authors.
- (c) Colour plates will not be accepted unless authors bear the cost.

Tables should be as simple and as few as possible; if they are very large or numerous a charge may have to be made to authors. When constructing tables, it would be helpful if authors would take into account the size and shape of the pages of *Animal Production*.

ANIMAL BEHAVIOUR

Supplement No. 1

LEARNING AND ASSOCIATED PHENOMENA IN INVERTEBRATES

*The Proceedings of a Symposium held at Cambridge, England, in July 1963
under the chairmanship of O.E. Lowenstein, F.R.S.*

Proceedings Editors: W. H. THORPE, F.R.S., and D. DAVENPORT.

The Symposium, of which this Supplement is a permanent record, was devoted to learning in all invertebrates including protozoa, coelenterates, annelids, crustacea, insects, and octopus.

The supplement not only contains invaluable material to those working on intervertebrates but also provides an up-to-date summary for those biologists who are interested in animal behaviour or the recent work on planarians.

20 papers. approx. 160 pages, many illustrations. 35s. (\$5.00)

A MONTHLY REVIEW OF VETERINARY SCIENCE

Editor: J. A. LAING Chairman of Editorial Board: SIR JOHN RITCHIE

The British Veterinary Journal

This, the oldest veterinary periodical in the British Commonwealth, has always maintained the broadest interest in animal welfare including regular articles on breeding and nutrition

Annual Subscription 100s.
U.S.A. & Canada \$17.50

Recent and future Papers include:

Hemsley: Infectious Synovitis in Broiler Breeding Stock. Osbaldiston: The Effect of Ventilation on Poultry Production. Sinclair: Studies on the Anaemia of Ovine Fascioliasis. Carnaghan, Crawford: Relationship between Ingestion of Aflatoxin and Primary Liver Cancer. Young: Artificial Insemination and Genetic Improvement of British Sheep. Fisher, Pirie: Malformations of the Ventricular Septal Complex in Cattle. Schipper: Rates and Routes of Sulphonamide Excretion in the Cow: Blood Levels following Single Intravenous and Oral Administrations. Innes: Pathology and Pathologists.

announcing **EXPERIMENTAL AGRICULTURE**

Experimental Agriculture is a journal concerned with the whole range of agricultural problems in developing countries. It aims to provide a link between academic research and agricultural practice.

Articles include authoritative and up-to-date reviews of new developments in scientific agriculture;

accounts of new experimental techniques, especially those concerned with methods of studying the agricultural environment, the relative merits of new crops, varieties and cultural operations and the application of biometry to field experimentation;

contributions from developing countries on the specific problems of increasing agricultural production, especially where this is at present based on peasant subsistence agriculture;

papers on the more technical and economic aspects of farming systems, especially where these bear on the problems of changing an existing system;

descriptions of successful experiments in extension methods, cooperation, community projects and related topics concerned with the sociological aspects of agricultural improvements.

Experimental Agriculture is a quarterly journal published by Cambridge University Press. It is successor to *The Empire Journal of Experimental Agriculture*.

The subscription price is £3. 15s. (U.S.A. \$13.50) including postage; single parts are available at £1. 5s. each (U.S.A. \$4.50). Orders may be sent to any bookseller or subscription agent, or direct to Cambridge University Press.

LIST OF SHORTENED TITLES, VOL. 32, No. 1. FEBRUARY 1965

- Food preparation and utilization by cattle. C. C. BALCH, W. H. BROSTER, J. A. F. ROOK and VALERIE J. TUCK.
- Heat treatment and B-vitamin content of milk. MARGARET E. GREGORY and H. BURTON.
- Effect of drying on fatty acids of milk. J. H. MOORE and D. L. WILLIAMS.
- C₂₀ branched fatty acid from butterfat. R. P. HANSEN, F. B. SHORLAND and JAMES D. MORRISON.
- Streptomyces albus* from Cheddar cheese. T. F. FRYER and M. ELISABETH SHARPE.
- Seaminess in Cheddar cheese. J. CONOCHIE and B. J. SUTHERLAND.
- Stage of lactation and milk composition. J. A. F. ROOK and R. C. CAMPLING.
- Sialic acid fraction of κ -casein. R. BEEBY.
- Deposition of milk solids. H. BURTON.
- Osmotic pressure of milk. J. V. WHEELLOCK, J. A. F. ROOK and F. H. DODD.
- A bacteriological reference flora. B. REITER, T. F. FRYER and M. ELISABETH SHARPE.
- Review. Diseases of dairy cattle. Salmonellosis. E. A. GIBSON.

Subscription price per Volume of 3 parts 80s. Single parts 30s.

THE JOURNAL OF AGRICULTURAL SCIENCE

VOL. LXIII, PART 3, DECEMBER 1964

- SCHWARZ, H. M., SCHOEMAN, C. A. and FÄRBER, M. S. Utilization of urea by sheep. I. Rates of breakdown of urea and carbohydrates *in vivo* and *in vitro*.
- FRENEY, J. R. An evaluation of naturally occurring fixed ammonium in soils.
- LANGLANDS, J. P. and CORBETT, J. L. A study of the 'dissolved faeces fraction' method for the indirect estimation of herbage intake.
- LEAT, W. M. F., CUTHBERTSON, A., HOWARD, A. N. and GRESHAM, G. A. Studies on pigs reared on semi-synthetic diets containing no fat, beef tallow and maize oil: composition of carcass and fatty acid composition of various depot fats.
- BUTTERWORTH, M. H. The digestible energy content of some tropical forages.
- LAZENBY, ALEC and ROGERS, H. H. Selection criteria in grass breeding. III. Chemical composition.
- MOUNT, L. E. A simple instrument for the measurement of low air speeds, with special reference to pig housing.
- PRESKOTT, J. H. D. and LAMMING, C. E. The effects of castration on meat production in cattle, sheep and pigs.
- HORROCKS, D. and PHILLIPS, G. D. The concentration of certain mineral elements in the alimentary tracts of European and Zebu steers.
- HORROCKS, D. and PHILLIPS, G. D. Mineral balances in European and Zebu steers.
- HORROCKS, D. Sodium and potassium balances and growth on high and low sodium diets. I. The addition of sodium to a low energy hay diet. II. The feeding of protein-rich concentrates in addition to sodium.
- CLEMENT, C. R. and WILLIAMS, T. E. Leys and soil organic matter. I. The accumulation of organic carbon in soils under different leys.
- LAWRIE, R. A., POMEROY, R. W. and CUTHBERTSON, A. Studies on the muscles of meat animals. VI. Comparative composition of various muscles in boars of two weight groups in relation to hogs.
- CRESSWELL, E., BENZIE, D. and BOYNE, A. W. Studies of the skeleton of the sheep. IX. A further study of the mineralization of the skeleton of breeding ewes on two Scottish hill farms.
- KERSHAW, W. J. S. *Piesma quadratum* (Fieb.) in Easy Anglia.
- STODDART, J. L. Seed ripening in grasses. III. Changes in chlorophyll and anthocyanin content.
- SLEE, J. Some results of multiple-mating and superovulation in sheep.
- ROBINSON, D. W., MORGAN, J. T. and LEWIS, D. Protein and energy nutrition of the bacon pig. III. The effect of reducing the protein content of pig diets at different live weights.
- THWAITES, C. J., YEATES, N. T. M. and POGUE, R. F. Objective appraisal of intact lamb and mutton carcasses.
- SPEDDING, C. R. W., BROWN, T. H. and LARGE, R. V. The interaction of internal parasites and nutrition in the utilization of grassland by sheep.

Articles are illustrated with plates and figures

The Journal of Agricultural Science is issued bi-monthly. Subscription (75s. per volume of three parts, two volumes yearly) may be sent to any Bookseller, or to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W.1

THE BRITISH JOURNAL OF NUTRITION

Shortened Versions of Titles from Vol. 19, No. 1. March 1965

- A 5-year study of food consumption of university students. By SONIA E. WALKER.
 Stable strontium and strontium-90 in human bone in the U.K., By R. H. MOLE.
 Effect of fasting on cholesterol and fatty acid levels in plasma and heart of the rat. By JENS G. NØRBY.
 Effect of raw soya beans on protein digestion and pancreas function in chickens. By S. LEPKOVSKY, F. FURUTA, T. KOIKE, N. HASEGAWA, M. K. DIMICK, K. KRAUSE and F. J. BARNES.
 Protein reserves and nitrogen content of organs in protein-depleted cocks. By JACOBUS P. H. WESSELS and HANS FISHER.
 Nutritional requirements of the protein-depleted chicken. By JACOBUS P. H. WESSELS and HANS FISHER.
 Food requirements and weight changes of men on Antarctic expeditions. By N. W. M. ORR.
 Effects of intraruminal infusions of volatile fatty acids and lactic acid on yield and composition of cow's milk. By J. A. F. ROOK, C. C. BALCH and V. W. JOHNSON.
 Effect of low-hay, high-maize diet on milk-fat secretion and plasma composition in the cow. By J. E. STORRY and J. A. F. ROOK.
 Strontium balance in breast-fed babies. By G. E. HARRISON, ALICE SUTTON and HILDA SHEPHERD.
 Effect of low-cobalt diet in rabbits. By K. INA SIMMETT and G. H. SPRAY.
 Comparison of biological methods with rats for determining nutritive value of proteins. By KATHLEEN M. HENRY.
 Action of dietary proteins and amino acids on the rat adrenal gland. By H. N. MUNRO, MARIAN H. STEELE and W. C. HUTCHISON.

Combined Subscription for The British Journal of Nutrition (4 issues) and The Proceedings of the Nutrition Society (2 issues) is £9 per annum.

Cambridge University Press, Bentley House, 200 Euston Road, London, N.W.1

NUTRITION ABSTRACTS AND REVIEWS

published by the

COMMONWEALTH BUREAU OF ANIMAL NUTRITION

Rowett Research Institute, Bucksburn, Aberdeen, Scotland

A quarterly publication bringing together in abstracts whatever is available of the world literature on human and animal nutrition in all its aspects. Each number contains a Review Article dealing with some subject of current interest.

The subscription to Volume 35, for 1965, is 150s. in countries which contribute to the Commonwealth Agricultural Bureaux, and 220s. (\$33.00) in other countries. Details may be obtained from the Secretary, Nutrition Abstracts and Reviews, at the address shown above.

CONSULTATION SERVICE

The Bureau is prepared, within the limits of its information, to answer enquiries from workers in laboratory research, field investigations or nutritional planning, but not from commercial sources, who do not themselves have access to the necessary literature.

BRITISH POULTRY SCIENCE

CONTENTS OF VOLUME 6, PART 1, JANUARY 1965

- OLSEN, M. W. Twelve year summary of selection for parthenogenesis in Beltsville Small White turkeys.
- SHARPE, E. and MORRIS, T. R. The protein requirements of two strains of laying pullets.
- HUNT, J. R. and HUNSAKER, W. G. Physiology of the growing and adult goose. III. Some nitrogen constituents of blood.
- THORNBURN, C. C. and WILLCOX, J. S. The caeca of the domestic fowl and digestion of the crude fibre complex. I. Digestibility trials with normal and caecectomised birds.
- THORNBURN, C. C. and WILLCOX, J. S. The caeca of the domestic fowl and digestion of the crude fibre complex. II. Experiments *in vivo* with fistulated birds, and the artificial and isolated caecum *in vitro*.
- HEALD, P. J. and ROOKLEDGE, K. A. The level of the free fatty acids of the plasma during an ovulatory cycle in the domestic fowl.
- BROWN, W. O. Effect of low-energy cereals and cereal by-products and of a vegetable fat supplement of egg production and food conversion in caged layers.
- BROWN, W. O., WARING, J. J. and SQUANCE, E. A study of the effect of variation in the calorie-protein ratio of a medium energy diet and a high energy diet containing sucrose on the efficiency of egg production in caged layers.
- FREEMAN, B. M. The relationship between oxygen consumption, body temperature and surface area in the hatching and young chick.
- KIRKWOOD, A. C. A trap perch for the control of the poultry red mite (*Dermanyssus gallinae*).
- TAYLOR, T. G. Dietary phosphorus and egg shell thickness in the domestic fowl.

This journal is published quarterly in January, April, July and October.
The annual subscription is 80s. (U.S.A. \$14.00), single parts 22s. 6d. (U.S.A. \$3.75). Orders and subscriptions may be sent to any bookseller or direct to the publishers:
