
Anafranil[®] **Geigy**

Anafranil is the most recent addition to the Geigy range of psychotropic drugs. In addition to its use in depression, where it has proved to be effective both by the oral route and by intravenous infusion (in the more seriously depressed patient), Anafranil is becoming established as a leading drug treatment for obsessional and phobic disorders. We will be pleased to forward further information relating to the use of Anafranil in the treatment of depression and phobic and obsessional disorders on request.

Anafranil is 3-chloro-5-(3-dimethylaminopropyl)-10, 11-dihydro 5H dibenz [b, f] azepine (clomipramine) hydrochloride

Full prescribing information is available.

Handbook of Sex Therapy

edited by **Joseph LoPiccolo** and **Leslie LoPiccolo**
State University of New York at Stony Brook

Featuring a spectrum of outstanding papers carefully selected from the literature, and eleven original contributions, this comprehensive source book examines a broad range of therapy approaches, confronts ethical issues, and explores sexual dysfunction in special populations. A volume in *Perspectives in Sexuality: Behavior, Research, and Therapy*. approx. 530 pp., illus., 1978, \$35.40/£18.59

The Prevention of Sexual Disorders Issues and Approaches

edited by **C. Brandon Qualls**, **John P. Wincze**,
and **David H. Barlow**
Brown University

Focusing on the prevention and treatment of sexual disorders, the authors examine such critical issues as cross-sexed identity, sexual offenders, sex education, pornography, and the role of anti-androgens. A volume in *Perspectives in Sexuality: Behavior, Research, and Therapy*. approx. 195 pp., 1978, \$17.94/£9.42

The Development of Affect

edited by **Michael Lewis**,
Educational Testing Service
and **Leonard A. Rosenblum**
State University of New York,
Downstate Medical Center

The first volume in an exciting new series, *Genesis of Behavior*, provides an integrated framework within which the meaning and development of affect can be understood. Essential information is presented on issues such as the measurement of affect, its relation to cognition and the development of self, and affective dysfunctions. approx. 415 pp., illus., 1978, \$27.00/£14.18

Attachment Behavior

edited by **Thomas Alloway**, **Patricia Pliner**,
and **Lester Krames**
University of Toronto

Draws enlightening parallels between animal and human behavior through investigations of the factors responsible for the development of social attachment between parents and their offspring. *Advances in the Study of Communication and Affect, Volume 3*. 240 pp., illus., 1977, \$27.00/£14.18

Autism

A Reappraisal of Concepts and Treatment

edited by **Michael Rutter**, University of London
and **Eric Schopler**, University of North Carolina
at Chapel Hill

This authoritative volume represents the most up-to-date analysis of current theory, research, and clinical practice in the study and treatment of autistic children. It reports on investigations conducted in a variety of environments, and evaluates many new ideas and approaches to treating autism. approx. 515 pp., 1978, \$29.40/£15.44

Contemporary Research in Behavioral Pharmacology

edited by **D. E. Blackman** and **D. J. Sanger**
University College, Wales

Providing an authoritative assessment of current research, this book illustrates the tremendous impact operant approaches has had on the field of behavioral pharmacology. 487 pp., illus., 1978, \$39.00/£20.48

Psychopharmacology of Aversively Motivated Behavior

edited by **Hymie Anisman**
Carleton University
and **Giorgio Bignami**
Istituto Superiore di Sanità, Italy

Presents a detailed, integrated analysis of the role of various drugs used to explore, and the neurochemical mechanisms underlying, a single class of behaviors—those which have aversive components. approx. 510 pp., illus., 1978, \$42.00/£22.05

Drugs and the Inheritance of Behavior

A Survey of Comparative Psychopharmacogenetics

by **P. L. Broadhurst**
The University of Birmingham, England

Examines the interrelationships of psychology, pharmacology, and genetics by applying the methodology of biometrical genetics to psychopharmacology. approx. 220 pp., illus., 1978, \$23.40/£12.29

TAVISTOCK 

SOCIAL ORIGINS OF DEPRESSION

A study of psychiatric disorder in women

This book describes one of the most important programmes of work in the field of psychiatry that has been carried out in recent years – an investigation, begun in 1968, into social factors that bring about depressive disorders in women. The study is based on depressed patients and a random sample of women living in the community.

The major contribution of this book is to link phenomena of individual experience with the broader social and economic structure. To the extent that the unequal distribution of risk of psychiatric disorder between men and women is the result of more widely recognized inequalities within society, the authors believe that it constitutes a major social injustice.

Hardback 422 76310 1 £12.50

THE YOUNG DRINKERS

A cross-national study of social and cultural influences

In this original sociological research study, Joyce O'Connor explores drinking behaviour and customs, attitudes towards drinking, and the social function and meaning of alcohol among three groups of young people and their parents. Special attention is paid to a wide range of ethnic, cultural, social, personal, parental and peer group influences upon young people's drinking habits and differences between the drinking behaviour of the English and the Irish examined. The author provides hard evidence in an area which, though of great social concern, is surprisingly ill-documented.

Hardback 422 76380 2 £14.25

Prices are net in the U.K. only.

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE58AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short summary of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary communications of up to about 1,500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* 1, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. $2\frac{3}{4}$ in.). *Diagrams* These will usually be reduced to $2\frac{3}{8}$ in. wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
