

JOURNAL OF APPLIED PROBABILITY
VOLUME 42 (2005): INDEX

	PAGES
ADLER, I., AHN, H.-S., KARP, R. M. AND ROSS, S. M. A probabilistic model for the survivability of cells	919–931
AHN, H.-S. AND RIGHTER, R. Multi-actor Markov decision processes	15–26
— see ADLER, I.	
AHN, S. AND RAMASWAMI, V. Efficient algorithms for transient analysis of stochastic fluid flow models	531–549
ASADI, M., EBRAHIMI, N., HAMEDANI, G. G. AND SOOFI, E. S. Minimum dynamic discrimination information models	643–660
ASTON, J. A. D. AND MARTIN, D. E. K. Waiting time distributions of competing patterns in higher-order Markovian sequences	977–988
AZAÍS, J.-M., LEÓN, J. R. AND ORTEGA, J. Geometrical characteristics of Gaussian sea waves	407–425
BACCELLI, F., FOSS, S. AND LELARGE, M. Tails in generalized Jackson networks with subexponential service-time distributions	513–530
BAEK, J. S. see LIM, K. E.	
BALL, F. AND BRITTON, T. An epidemic model with exposure-dependent severities	932–949
— AND MILNE, R. K. Simple derivations of properties of counting processes associated with Markov renewal processes	1031–1043
BARNDORFF-NIELSEN, O. E. AND LEONENKO, N. N. Burgers’ turbulence problem with linear or quadratic external potential	550–565
BÄUERLE, N. see RIEDER, U.	
BINGHAM, N. H. Doob: a half-century on	257–266
BON, J.-L. AND ILLAYK, A. Ageing properties and series systems	279–286
BORODOVSKY, M. see MITROPHANOV, A. YU.	
BOROVKOV, K. AND NOVIKOV, A. Explicit bounds for approximation rates of boundary crossing probabilities for the Wiener process	82–92
BOXMA, O. see KELLA, O.	
BRITTON, T. see BALL, F.	
BRUMMELHUIS, R. AND GUÉGAN, D. Multiperiod conditional distribution functions for conditionally normal GARCH(1, 1) models	426–445
BRUSS, F. T. What is known about Robbins’ problem?	108–120
CAI, J. AND LI, H. Conditional tail expectations for multivariate phase-type distributions	810–825
CAVAZOS-CADENA, R. AND MONTES-DE-OCA, R. Nonstationary value iteration in controlled Markov chains with risk-sensitive average criterion	905–918
CECI, C. AND GERARDI, A. Multitype branching processes observing particles of a given type	446–462
CHEN, M.-R. AND WEI, C.-Z. A new urn model	964–976
CHEN, R. W., SHEPP, L. A., YAO, Y.-C. AND ZHANG, C.-H. On optimality of bold play for primitive casinos in the presence of inflation	121–137
CHEN, Z. AND KULPERGER, R. A stochastic competing-species model and ergodicity	738–753
CHENG, D. see WANG, Y.	
CLANCY, D. A stochastic SIS infection model incorporating indirect transmission	726–737
COSTA, O. L. V. AND DUFOUR, F. A sufficient condition for the existence of an invariant probability measure for Markov processes	873–878
DASSIOS, A. AND JANG, J.-W. Kalman–Bucy filtering for linear systems driven by the Cox process with shot noise intensity and its application to the pricing of reinsurance contracts	93–107
DEL PUERTO, I. see GONZÁLEZ, M.	

DRAIEF, M., MAIRESSE, J. AND O'CONNELL, N. Queues, stores, and tableaux	1145–1167
DUFFY, K. AND METCALFE, A. P. How to estimate the rate function of a cumulative process	1044–1052
—, — The large deviations of estimating rate functions	267–274
DUFOUR, F. <i>see</i> COSTA, O. L. V.	
EBRAHIMI, N. <i>see</i> ASADI, M.	
EKSTRÖM, E., JANSON, S. AND TYSK, J. Superreplication of options on several underlying assets	27–38
FERREIRA, F. AND PACHECO, A. Level-crossing ordering of semi-Markov processes and Markov chains	989–1002
—, — Level crossing ordering of skip-free-to-the-right continuous-time Markov chains	52–60
FOSS, S. <i>see</i> BACCELLI, F.	
FROSTIG, E. On the expected time to ruin and the expected dividends when dividends are paid while the surplus is above a constant barrier	595–607
GAMARNIK, D. AND MOMČILOVIĆ, P. A transposition rule analysis based on a particle process	235–246
GERARDI, A. AND TARDELLI, P. Heterogeneous population dynamical model: a filtering problem	346–361
— <i>see</i> CECI, C.	
GHAHRAMANI, S. AND WOLFF, R. W. On finite moments of full busy periods of GI/G/c queues	275–278
GOLDSTEIN, L. Berry–Esseen bounds for combinatorial central limit theorems and pattern occurrences, using zero and size biasing	661–683
GONZÁLEZ, M., MARTÍNEZ, R. AND MOTA, M. On the geometric growth in a class of homogeneous multitype Markov chain	1015–1030
—, MOLINA, M. AND DEL PUERTO, I. Asymptotic behaviour of critical controlled branching processes with random control functions	463–477
GRAY, B., POLLETT, P. AND ZHANG, H. On the existence of uni-instantaneous Q -processes with a given finite μ -invariant measure	713–725
GRÜBEL, R. AND REICH, M. Rarity and exponentiality: an extension of Keilson's theorem, with applications	393–406
