

Index of Subjects

Numerals show only the initial page of passages concerned with the subject.

Numerals followed by the letter A refer to pages in Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society.

- Abomasum, secretion, lipolytic activity, pre-ruminant calf 20A
- Absorption, lipids, ruminant and non-ruminant intestine 207
- Absorption, minerals, small and large intestines, pig 47A
- Absorption, site, magnesium, sheep 11A
- Absorption, vitamin D, intestine, man 125
- Acetate, product of fatty acid oxidation, utilization 244
- Acetyl-CoA carboxylase, role in fatty acid biosynthesis 217
- Adipose tissue, cellularity, obesity, man 85A
- Adrenaline, effect on adipose tissue fatty acid synthesis 217
- Adrenaline, effect on adipose tissue lipolysis, genetically obese mouse and rat 253
- Age, effect on blood and liver folate concentrations, cat, rat, dog, guinea-pig, rabbit 25A
- Alkaline phosphatase, serum levels, diagnosis of rickets, man 104, 112
- Amino acid(s) *see also* Leucine, Lysine, Tryptophan, Valine
- Amino acid(s), apparent digestibility, comparison of ileal and faecal measurements, growing pig 94A
- Amino acid(s), dietary requirements, fish 58
- Amino acid(s), essential, effect on urinary urea excretion, growing pig 99A
- Amino acid(s), flow into small intestine, effect of dietary carbohydrate, sheep 67A
- Amino acid(s), free, supplementation of poor-quality proteins, rat, chick 1A
- Ammonia, concentration in rumen and blood, effect of dietary urea, cow 52A
- Anorexia, oxygen consumption, man 14A
- Antibiotics, use as yield promoters, fowl 47
- Arachidonic acid, metabolism to prostaglandins 279
- Argininosuccinate lyase, effect of protein deficiency, rat 30A
- Ascorbic acid, common cold therapy, man 7A
- Ascorbic acid, infant milks, estimation 7A
- Ascorbic acid, plasma levels, effect of fenfluramine, man 123A
- Atherosclerosis, effect of dietary sucrose and cholesterol, cockerel 81A
- Atherosclerosis, effect of dietary sucrose and fats, cockerel 82A
- Atherosclerosis, effect of dietary sucrose and hydrogenated coconut oil, Dutch belted rabbit 125A
- Bacteria *see also* *Bacteroides rumenicola*, *Pseudomonas methylotropa*
- Bacteria, rumen, effect of feeding with whole or pelleted barley, lamb 63A
- Bacteroides rumenicola*, fermentation products, rumen, gnotobiotic lamb 72A
- Benzoic acid, production by rumen microorganisms, sheep 69A
- Bile, role in lipid absorption 206
- Biotin, deficiency, embryonic development, fowl 1
- Blood, ammonia concentration, effect of dietary urea, cow 52A
- Blood, composition, effect of high-protein diet, man 69A
- Blood, glucose concentration, effect of ingestion of glucose syrups, man 60A
- Blood, serum composition, effect of food and water deprivation, rat 37A
- Body weight, 'buffer' control theory, man 84A
- Body-weight, regulation, effect of centrifugation, rat 19A
- Boyd Orr, Lord, leadership of FAO 146
- Brain, fatty acid uptake from plasma 288
- Brain, lipid synthesis, effect of postnatal undernutrition, rat 40A
- Brain, specificity of polyunsaturated fatty acid content 260
- Caffeine, intake in tea and coffee, man 18A
- Calcium, absorption, effect of dietary fibre 120A
- Calcium, dietary, effect on lead retention and release 89A
- Calcium ion, effect on adipose tissue lipolysis 236
- Calcium ion, intramitochondrial, mechanism of insulin action on fatty acid synthesis 221
- Calcium, metabolism, control, fowl 36
- Carbohydrate(s) *see also* Fructose, Glucose, Glycogen, Sucrose, Trehalose
- Carbohydrate(s), effect on passage of amino acids to small intestine, sheep 67A
- Carbohydrate(s), digestibility, fowl 5
- Castration, effect on protein synthesis, rat 28A
- Cell membrane, fatty acid composition, importance of unsaturated fatty acids 280, 284
- Cellulase, fungal, prediction of digestibility of forage 24A
- Centrifugation, effect on body-weight regulation, rat 19A

- Cholecalciferol, anti-rachitic factor, man 106, 119
- Cholecalciferol, metabolism, fowl 36
- Cholesterol, bile salts, binding by fibre in vitro 59A
- Cholesterol, metabolism, effect of diet 271
- Cholesterol, plasma levels, effect of fibre, rat 17A
- Cholesterol, plasma levels, effect of fibre, rat, hamster 16A
- Cholesterol, plasma levels, regional and social differences, man 274
- Clearing-factor lipase *see* Lipoprotein lipase
- Coffee, caffeine intake, man 18A
- Colostrum, composition, effect of low-protein diet, cow 74A
- Copper, availability, pig-slurry and slurry-dressed herbage, sheep 9A
- Copper, deficiency, calf 76A
- Copper, dietary, effect on hepatic Δ_9 -desaturase activity, pig, rat 262
- Copper, interaction with molybdenum and sulphide, rumen contents, sheep 10A
- Coprophagy, effects on nutrition, rabbit 77
- Cyanocobalamin, deficiency, embryonic development, fowl 2
- Cyclic AMP, control of adipose tissue lipolysis 233
- Dairy-farming programmes, India 177
- Desaturation, fatty acids, effect of diet 261
- Desaturation, fatty acids, hepatic 227
- Diabetes, clinics, dietary policy 22A
- Diabetes, fatty acid metabolism, man 265
- Diet, carbohydrate content, effect on lipid metabolism, rat 56A
- Diet, carbohydrate content, effects in pregnancy and lactation, rat 80A
- Diet, effect on tissue lipids 257
- Diet, high-protein, effect on blood and urine composition, man 69A
- Diet, low-protein, pregnancy, effect on roughage intake, colostrum composition and immune globulins of offspring, cow 74A
- Diet, maternal, fat content, effect on body fat composition of neonate, guinea-pig 107A
- Diet(s) principles of formulation, fowl 43
- Diet, relation to myocardial infarction, women 83A
- Diet, sucrose content, effect on lipid metabolism, Dutch belted rabbit 124A
- Diet, sucrose and cholesterol content, effect on hyperlipidaemia and atherosclerosis, cockerel 81A
- Diet, sucrose and fat content, effect on hyperlipidaemia and atherosclerosis, cockerel 82A
- Diet, sucrose and hydrogenated coconut oil content, effect on atherosclerosis, Dutch belted rabbit 125A
- Diet, sunflower-seed oil content, effect on lipid metabolism, Zucker rat 109A
- Diet, whole or pelleted barley, effect on rumen bacteria, lamb 63A
- Diet, whole or pelleted barley, effect on rumen digestion, sheep 64A
- Dietetics, policy, British diabetic clinics 22A
- Digesta, protein content, technique for estimation, ruminant 65A
- Digestibility, apparent, amino acids, comparison of ileal and faecal measurements, growing pig 94A
- Digestibility, apparent, nutrients, comparison of ileal and faecal measurements, growing pig 46A
- Digestibility, forage, prediction using fungal cellulase 24A
- Digestibility, nutrients, effect of organochlorate pesticides, rat 93A
- Digestibility, nutrients, fowl 5
- Drugs *see also* Ergocalciferol, Fenfluramine, D-Isoascorbic acid, Oestrogen
- Duodenum, amino acid flow, effect of dietary carbohydrate, sheep 67A
- Egg, albumen quality on storage, effect of dietary magnesium, hen 45A
- Egg production, energy requirement, fowl 16
- Egg production, utilization of new protein sources, fowl 21
- Embryonic development, nutrition, fowl 1
- Energy, losses, oven-drying of foods and carcasses 58A
- Energy metabolism, effect of litter size, rat 105A
- Energy metabolism, fasting, pig 13A
- Energy metabolism, fish 62
- Energy metabolism, fowl 13
- Energy metabolism, growth, pregnancy and lactation, rabbit 81
- Energy metabolism, growth, Zucker rat 54A
- Energy metabolism, overfeeding, rat 15A
- Energy metabolism, thermic effect of food, high altitude, man 57A
- Energy source, relative contributions of glucose and fatty acids, ruminants and non-ruminants 245
- Energy value, mixed grass silage, sheep 101A
- Enzyme(s) *see also* Acetyl-CoA carboxylase, Alkaline phosphatase, Argininosuccinate lyase, Cellulase, Fatty acid synthetase, Lipoprotein lipase, Ornithine decarboxylase, Phytase, Protein kinase, Pyruvate dehydrogenase, Triglyceride lipase
- Enzyme(s), lipolytic, abomasal secretion, pre-ruminant calf 20A
- Equipment, urine measuring and sampling, sheep 71A

- Ergocalciferol, anti-rachitic factor, man 102, 119
- Famine 159, 161, 167, 173, 181, 187, 195
- Famine, Ethiopia 1973-4 167
- Famine, Ethiopia 1973-4, Harerge province, report 115A
- Famine, Ethiopia 1973-4, Wollo province, report 114A
- Famine, physical effects 162
- Famine relief, UK contributions 187
- Famine, social and economic factors 181
- Farm animals, unconventional, survey 51
- Fasting, effect on energy metabolism, pig 13A
- Fasting, psychological effects, man 165
- Fat(s) digestibility, fowl 6
- Fat-free body mass, composition, men and women 114A
- Fatty acid(s) *see also* Acetate, Arachidonic acid, Fatty acyl-CoA, Linoleic acid, γ -Linolenic acid, Polyunsaturated fatty acids
- Fatty acids, energy source 241
- Fatty acids, plasma levels, control, diabetes, man 265
- Fatty acids, substrates for hepatic glyceride synthesis 225
- Fatty acids, synthesis in adipose tissue, regulation 217
- Fatty acid synthetase, response to diet 260
- Fatty acid(s), volatile, concentrations in hind-gut and blood, diurnal variation, rabbit 21A
- Fatty acyl-CoA, regulation of fatty acid biosynthesis 222
- Fenfluramine, effect on blood glucose and ascorbic acid, man 123A
- Fibre, binding of calcium, relationship to unsubstituted uronic acids 120A
- Fibre, dietary, effect on cholesterol metabolism 276
- Fibre, wheat, hypocholesterolaemic action, rat 17A
- Fibre, wheat bran and mould, bile salt binding in vitro 59A
- Fibre, wheat bran and mould, hypocholesterolaemic action, rat, hamster 16A
- Field-bean, protein, feeding-stuff, preruminant calf 102A
- Folate, blood and liver concentrations, effect of age, cat, rat, dog, guinea-pig, rabbit 25A
- Folic acid, deficiency, embryonic development, fowl 2
- Food and nutrition research, committee report, colloquium 201
- Food preferences, wild ruminants 85
- Food processing, effect on digestibility, fowl 6
- Fructose, dietary, effect on hepatic lipogenesis 257
- Fructose, effect on serum composition, hypertriglyceridaemia, man 54A
- Fusarium* mould, fibre, binding of bile salts in vitro 59A
- Glucose, concentration in blood, effect of fenfluramine, man 123A
- Glucose, concentration in blood, effect of ingestion of glucose syrups, man 60A
- Glucose tolerance, old age, man 86A
- Glyceride synthesis, bioenergetics 228
- Glyceride synthesis, hepatic, control 225
- Glycogen, storage and release, effect of protein deficiency, rabbit 96A
- Glycosyl ureides, dietary supplements, ruminants 90A
- Gossypol, reaction with cottonseed protein 48A
- Growth, effect of artificial diets, prawn 72
- Growth, effect of breast- and bottle-feeding, infant 118A
- Growth, effect of lighting period, chick 3A
- Growth, effect of novel dietary proteins, fowl 21
- Growth, muscle, sex difference, early under-nutrition, rat 97A
- Growth, muscle width, radiographic technique, rat 39A
- Heat damage, lysine and methionine availability, soya-bean protein 26A
- High altitude, thermic effect of food, man 57A
- Hormonal control, hepatic glyceride synthesis 228
- Hormone(s) *see also* Adrenaline, Cyclic AMP, Insulin, Oestrogen, Parathyroid hormone, Prostaglandins
- Hydroxylation, vitamin D, regulation 140
- Hyperlipidaemia, effect of dietary sucrose and cholesterol, cockerel 81A
- Hyperlipidaemia, effect of dietary sucrose and fats, cockerel 82A
- Hyperlipoproteinaemia, myocardial infarction patients, women 83A
- Hypertriglyceridaemia, effects of oral fructose load, man 54A
- Hypophysectomy, effect on protein synthesis, rat 95A
- Immune globulin, concentration, effect of maternal low-protein diet, calf 74A
- Immune response, effect of maternal protein deficiency, rat 41A
- Infant feeding, breast- and bottle-feeding, effect on growth 118A
- Infant feeding, breast- and bottle-feeding, effect on nutrition of mother 116A
- Infant feeding, lactose and sucrose supplements 87A
- Infection, bacterial and viral, effect on lipid metabolism, fowl 31
- Insulin, effect on adipose tissue fatty acid synthesis 217
- Insulin, effect on adipose tissue lipolysis 233
- Insulin, glucagon-stimulated secretion, effect of protein deficiency, rabbit 96A

- Insulin, plasma levels and sensitivity, old age, man 86A
- Iodine, deficiency, embryonic development, fowl 2
- D-Isoscorbic acid, common cold therapy, man 7
- Lactation, effect of dietary carbohydrates, rat 80A
- Lead, retention and release, effect of dietary calcium, rat 89A
- Lead, toxicity, effect of dietary sulphur, sheep 77A
- Leucine, dietary, effect on nicotinic acid requirement, rat 120A
- Leucine, endogenous loss, low-protein diet, rat 31A
- Lighting period, effect on growth, chick 3A
- Linoleic acid, deficiency, embryonic development, fowl 3
- Linoleic acid, dietary, effect on egg size, fowl 47
- Linoleic acid, essential fatty acid activity 279
- Linoleic acid, metabolism, sheep 88A
- γ -Linolenic acid, essential fatty acid activity 279
- Lipid(s) *see also* Acetate, Arachidonic acid, Cholesterol, Fat(s), Fatty acid(s), Fatty acyl-CoA, Hyperlipidaemia, Hypertriglyceridaemia, Linoleic acid, γ -Linolenic acid, Lipogenesis, Polyunsaturated fatty acids, Prostaglandins, Protected lipid, Soaps, Triglycerides
- Lipids, digestion, ruminant and non-ruminant 203
- Lipid(s), metabolism, 203, 211, 217, 225, 233, 241, 249, 257, 265, 271, 279, 287
- Lipid(s), metabolism, effect of dietary carbohydrate, rat 56A
- Lipid(s), metabolism, effect of dietary sucrose, Dutch belted rabbit 124A
- Lipid(s), metabolism, fowl 29
- Lipid(s), plasma levels, herbivorous mammals 105A
- Lipid(s), serum levels, dietary oestrogen, baboon 55A
- Lipofuscin, accumulation, effect of vitamin E, rat 122A
- Lipogenesis, abnormalities, genetically obese mouse and rat 250
- Lipoprotein lipase, role in plasma tryglyceride metabolism 211
- Lipoproteins, plasma, composition, herbivorous mammals 105A
- Lymph, transport of lipids 208
- Lysine, availability, heat-damaged soya-bean protein 26A
- Meat, production, potential, wild ruminants 91
- Micronization, soya beans, effect on digestibility, rat 50A
- Micronization, soya beans, effect on nutritive value 49A
- Micro-organisms, rumen, chemical composition, sheep 62A
- Milk production, effect of feeding protected lipids, cow 108A
- Mineral(s) *see also* Calcium, Copper, Iodine, Lead, Magnesium, Manganese, Molybdenum, Phosphorus, Sulphide, Sulphur, Zinc
- Mineral(s), absorption, small and large intestines, pig 47A
- Mineral(s), nutrition, fowl 35
- Molybdenum, interaction with copper and sulphide, rumen contents, sheep 10A
- Nicotinic acid, requirement, effect of dietary leucine, rat 120A
- Nicotinic acid, supplementation, pregnancy, rat 27A
- Nutrient intake, students, effect of type of accommodation 119A
- Nutrition, crustacea 69
- Nutrition, domestic and wild game birds 95
- Nutrition, new farm animals 51, 57, 65, 75, 85, 95
- Nutrition, poultry 1, 5, 13, 21, 29, 35, 43
- Nutritive value, barley and maize, chicken 2A
- Nutritive value, diets, effect of organochlorate pesticides, rat 93A
- Obese-hyperglycaemic mouse, genetically obese, lipid metabolism 249
- Obesity, cellularity of adipose tissue, man 85A
- Obesity, oxygen consumption, man 14A
- Oestrogen, dietary supplement, effect on serum lipids, baboon 55A
- Organochlorate pesticides, ingestion, effect on digestibility and nutritive value of diet, rat, 93A
- Ornithine decarboxylase, induction in under-nutrition and rehabilitation, rat 32A, 38A
- Osteomalacia and rickets 101, 111, 119, 131
- Osteomalacia and rickets, epidemiology, man 132
- Overfeeding, rat 15A
- Oxygen consumption, obesity and anorexia, man 14A
- Pancreatic juice, role in lipid absorption 206
- Pantothenic acid, deficiency, embryonic development, fowl 1
- Parathyroid hormone, serum levels in rickets, man 113
- Phenol(s), presence in urine, effect of diet, sheep 70A
- Magnesium, dietary supplements, effect on egg albumen quality, hen 45A
- Magnesium, site of absorption, sheep 11A
- Manganese, deficiency, embryonic development, fowl 2

- Phosphorus, deficiency, embryonic development, fowl 3
- Phosphorus, dietary supplements as ammonium polyphosphate, sheep 78A
- Phytase, yeast, effect on dietary phytate availability, man 136
- Phytate, dietary, effect on calcium absorption, man 121
- Phytate, effect on zinc absorption and excretion, retention of minerals, rat 8A
- Pig-slurry, copper availability, sheep 9A
- Polyunsaturated fatty acids, presence in artificial infant milks and human milk 291
- Polyunsaturated fatty acids, presence in brain lipids 287
- Poverty, contribution to famine 170
- Pregnancy, effect of dietary carbohydrate, rat 80A
- Pregnancy, low-protein diet, effect on roughage intake, colostrum and immune globulins of offspring, cow 74A
- Pregnancy, protein metabolism, rat 27A
- Prostaglandins, biosynthesis from fatty acids 281
- Protected lipid, dietary, effect on milk and depot fat, ruminant 259
- Protected protein, casein, effect on amino acid flow to duodenum, sheep 66A
- Protein, available lysine content, microbiological assay 100A
- Protein, bacterial, feeding-stuff, pig 51A
- Protein, content of duodenal digesta, technique for estimation, ruminant 65A
- Protein, deficiency and rehabilitation, effect on protein turnover, rat 33A
- Protein, deficiency, animal colony, significance for man 34A
- Protein, deficiency, argininosuccinate lyase activity, rat 30A
- Protein, deficiency, effect on insulin secretion and glycogen metabolism, rabbit 96A
- Protein, deficiency, marginal, serum composition, rat 42A
- Protein, deficiency, maternal, effect on immune response of offspring, rat 41A
- Protein, dietary level, toxicity of tannic acid, turkey 2A
- Protein(s), digestibility, fowl 6
- Protein kinase, phosphorylation of enzymes, activation by cyclic AMP 235
- Protein, low dietary level, endogenous loss of leucine, rat 31A
- Protein, metabolism, pregnancy, rat 27A
- Protein, poor-quality, supplementation with amino acids, rat, chick 1A
- Protein, quality, cottonseed, effect of gossypol 48A
- Protein, quality, effects on growth rate, rabbit 79
- Protein, supplementation with tryptophan, rat 92A
- Protein, synthesis, effect of castration, rat 28A
- Protein, synthesis, effect of hypophysectomy, rat 95A
- Protein, turnover, effect of protein deficiency and rehabilitation, rat 33A
- Protein, turnover rate, muscle and liver, sheep 91A
- Protein(s), utilization, fish 57
- Protein(s), utilization, growth and egg production, fowl 21
- Protein-energy malnutrition, anthropometric measurements, child 35A
- Pseudomonas methylotropa*, protein, feeding-stuff, pig 51A
- Pyruvate dehydrogenase, role in fatty acid biosynthesis 217
- Renal failure, vitamin D nutrition, man 129
- Retinol, toxicity, self-medication, man 44A
- Riboflavin, deficiency, embryonic development, fowl 1
- Rickets, nutritional, Asian immigrants in the UK 106, 111
- Rickets, nutritional, Glasgow children 101
- Rumen, bacteria, effect of feeding with whole or pelleted barley, lamb 63A
- Rumen, contents, interaction of copper, molybdenum and sulphide, sheep 10A
- Rumen, digestion, effect of feeding with whole or pelleted barley, sheep 64A
- Rumen, fermentation, effect of altering dilution rate, lamb 111A
- Rumen, fermentation products, *Bacteroides ruminicola*, gnotobiotic lamb 72A
- Rumen, liquor, ammonia concentration, effect of dietary urea, cow 52A
- Rumen, metabolism of aromatic compounds, sheep 69A, 70A
- Rumen, microbial matter, composition, sheep 62A
- Rumen, microbial population, effect of mineral supplements, lamb 113A
- Rumen, protein degradation, protected casein, sheep 66A
- Silage, mixed grass, energy value to sheep 101A
- Soaps, metal, effect on retention of minerals, chick 5A
- Social factors, effects on nutrition, game birds 96
- Soya beans, digestibility, effect of micronization 50A

- Soya beans, nutritive value, effect of micronization 49A
- Steatosis, hepatic, aetiology, fowl 32
- Stress, effect on lipid metabolism, fowl 31
- Sucrose, presence in urine, man 23A
- Sulphide, interaction with copper and molybdenum, rumen contents, sheep 10A
- Sulphur, dietary, effect on lead toxicity, sheep 77A
- Tea, caffeine intake, man 18A
- Technique, amino acid profiles, protein content of duodenal digesta, ruminant 65A
- Technique(s), aquaculture, crustacea 65
- Technique, measuring and sampling, urine, sheep 71A
- Technique, microbiological assay, available lysine, proteins 100A
- Technique, oven-drying foods and carcasses, energy losses 58A
- Technique, radiographic, muscle growth measurement, rat 39A
- Technique, serum analysis, marginal protein deficiency, rat 42A
- Technique, spectroscopic, ascorbic acid, infant milks 7A
- Temperature, regulation, effect on water requirements, wild ruminants 86
- Toxicity, lead, effect of sulphur, sheep 77A
- Toxicity, retinol, man 44A
- Toxicity, tannic acid, effect of dietary protein, turkey 2A
- Trace element(s), requirements, fowl 35
- Trehalose, presence in urine, man 23A
- Triglyceride lipase, adipose tissue, regulation 233
- Triglyceride(s), plasma, transport and metabolism 211
- Tryptophan, supplementation of dietary protein, rat 92A
- Undernutrition, postnatal, effect on enzymes of brain lipid synthesis, rat 40A
- Undernutrition, sex difference in muscle growth, rat 97A
- Undernutrition and rehabilitation, induction of ornithine decarboxylase, rat 32A, 38A
- Urea, dietary supplements, effect on rumen and blood ammonia concentration, cow 52A
- Urea, urinary excretion, effect of essential amino acids, growing pig 99A
- Urine, aromatic acid and phenol content, effects of infusion and dietary intake, sheep 70A
- Urine, composition, effect of high-protein diet, man 69A
- Valine, metabolism, high- or low-protein diet, rat 43A
- Vitamin(s) *see also* Ascorbic acid, Biotin, Cholecalciferol, Cyanocobalamin, Ergocalciferol, Folate, Folic acid, Nicotinic acid, Pantothenic acid, Retinol, Riboflavin, Vitamin D, Vitamin E
- Vitamin(s), dietary levels, margins of safety, fowl 45
- Vitamin(s), requirements, rabbit 82
- Vitamin C *see* Ascorbic acid
- Vitamin D, anti-rachitic function, man 103, 111, 119, 132, 139
- Vitamin E, deficiency, embryonic development, fowl 2
- Vitamin E, supplements, effect on lipofuscin accumulation, rat 122A
- World Food Board 148
- World Food Conference, Rome 1974 155, 190, 195
- Zinc, absorption and faecal excretion, effect of phytate, rat 8A
- Zinc, deficiency, effect on growth, Zucker rat 103A
- Zinc, deficiency, embryonic development, fowl 2
- Zucker rat, growth, effect of zinc deficiency 103A
- Zucker rat, growth, regulation of food intake 54A
- Zucker rat, lipid metabolism 249
- Zucker rat, lipid metabolism, effect of dietary sunflower-seed oil 109A
