PRODUCTS OF MODERN PHARMACY

Red Gum "Tabloids" (B. W. & CO.).

Red Gum, an exudation from the Australian *Eucalyptus Rostrata*, is a mild styptic and antiseptic, and an excellent local and general astringent. When a **Red Gum "Tabloid"** is allowed to dissolve in the mouth the continuous action of the drug on the mucous surface of the throat is fully secured. Great care has been exercised so to adjust the relative proportions of the ingredients that the full therapeutic effect may be obtained without offending the palate or affecting the appetite.

Supplied in metal boxes of 35 or bottles of 100 "Tabloids" at 5d. and 1s. per bottle.

Compound Bromide "Tabloids" (B. W. & CO.).

Each "Tabloid" contains—

| | | | |
|-----------------------|-------|----------------------|----------|
| Strontium Bromide ... | 2 gr. | Ammonium Bromide ... | 1 gr. |
| Sodium Bromide ... | 2 gr. | Sodium Arseniate ... | 1/60 gr. |

In cases where the bromides have to be administered in large doses and regularly it is found that the salts of strontium, sodium, and ammonium are less depressing than that of potassium, and that the combination of these three bromides, with a small dose of an arseniate, forms the best method of continuous bromide treatment. In the **Compound Bromide "Tabloid"** the dose of arseniate of sodium is such as to allow six "Tabloids" (that is, thirty grains of the combined bromides) to be given in one dose when necessary.

Compound Bromide "Tabloids" are supplied in bottles of 100 "Tabloids" at 1s. 4d. per bottle.

Compound Phenacetin "Tabloids" (B. W. & CO.).

"The investigations of the Therapeutic Committee of the British Medical Association conclusively proved that phenacetin is one of the safest antipyretics, and physicians find that in small doses it succeeds when others fail. But even small doses sometimes depress the heart greatly; hence the introduction by Messrs. BURROUGHS, WELLCOME & Co. of a compound phenacetin "tabloid" containing 4 grains of phenacetin and 1 grain of caffeine is appropriate."—*The Chemist and Druggist*, January 9th, 1897.

Compound Phenacetin "Tabloids" are supplied in bottles of 25 and 100 at 10d. and 2s. 3d. per bottle.

Cascara Sagrada and Belladonna "Tabloids"

(B. W. & CO.).

A valuable combination containing intestinal stimulant, tonic, and laxative ingredients, the formula being—

| | | | |
|-----------------------------|---------|------------------------|---------|
| Cascara Sagrada Extract ... | 2 gr. | Belladonna Extract ... | 1/3 gr. |
| Nux Vomica Extract ... | 1/4 gr. | Capsicine... .. | 1/5 gr. |

The Medical Press, Dec. 16th, says: "The 'Tabloids' being sugar coated constitute a very agreeable form of exhibiting the combination."

Compound Cascara Sagrada and Belladonna "Tabloids" are supplied in bottles of 25 and 100, at 9d. and 1s. 6d. per bottle.

BURROUGHS, WELLCOME & CO.,

SNOW HILL BUILDINGS, LONDON, E.C.

Australasian Address—SYDNEY, N.S.W.

Cable and Telegraphic Address: "Burcome, London."
