ERRATUM

Larson, D.J. 1989. Revision of North American *Agabus* Leach (Coleoptera: Dytiscidae): introduction, key to species groups, and classification of the *ambiguus*-, *tristis*-, and *arcticus*-groups. *Can. Ent.* **121**: 861–919.

On p. 870, the following should be added to couplet 26 of the key.

26'. Male anterior protarsal claw not toothed; epipleuron piceous to black with at most lateral margin pale; prosternal process broader, flattened basally and strongly discontinuous in convexity and plane with median line of prosternum; male elytral sculpture consisting of irregularly sized and shaped meshes, female with lines deep and sculpture coarse but meshes not longitudinally stretched *A. obsoletus*-group

On p. 896, line 22 should read “The North American species occur in permanent lentic waters.”
