THE BERLIN BLOCKADE

A Study in Cold War Politics

By W. Phillips Davison

This dramatic story of the Berlin Blockade affords the reader a close-up view of many of the most important elements of the cold war: Soviet diplomacy, communist techniques of propaganda and terror, the lumbering process of Allied decision-making, and the strength and weaknesses of the Western coalition. The author shows how the Soviets skillfully initiated and maintained the crisis and how the Allies met the challenge with the ingenious air-lift. Most important, he shows why the people of Berlin resisted so stubbornly and how they were able to hold out during the long blockade winter. *A RAND Corporation Research Study.*

Conquest of Violence

The Gandhian Philosophy of Conflict

By JOAN V. BONDURANT

An exciting study of Gandhi's technique of nonviolence, which he called *satyagraha*, and described as a "movement intended to replace methods of violence, based entirely upon truth." In terms familiar to the West, the author explores the distinguishing characteristics of the Gandhian technique, the relevance of continuing experiments in its refinement, and the far-reaching implications *satyagraha* has for social and political philosophy and the problem of conflict on all levels.

Ethics in a World of Power

The Political Ideas of Friedrich Meinecke

By RICHARD W. STERLING

Writing from a country shattered by two World Wars and by Nazi barbarism, Friedrich Meinecke, Germany's foremost historian of this century, was deeply troubled by the problem of reconciling power and justice in international affairs. This study of his political philosophy traces his thinking about nationalism and power politics, the dilemmas that beset the man of action in political life, and the possibility of "ethics in a world of power." The author studied under Meinecke and used primary sources in Germany.

Population Growth and Economic Development in Low-Income Countries

By ANSLEY J. COALE and EDGAR M. HOOVER

A study of the alternatives confronting low-income countries with respect to population growth that shows the nature and extent of economic gains resulting from fertility reduction. India is used as a case study in this book that has direct implications for all low-income, agrarian areas entering into a program of economic development. 402 pages. Tables & charts. \$8.50
