CORRIGENDUM

On isotropic tensors

SIR HAROLD JEFFREYS

(1) *Proc. Cambridge Philos. Soc.* **73** (1973), page 173

Dr E. Leibowitz has called my attention to a mistake in my paper
on isotropic tensors. (1) On p. 173, if l_{12} is annihilated as stated and
then we annihilate l_{13} by the same method, a new contribution to l_{12}
appears. The correct method is to choose α so as to annihilate l_{21}.
Then a suitable rotation on the 13 plane removes l_{31} without re-
introducing l_{21}. The rest of the argument stands.
