The fly overcomes gravity (**g** for short) by means of suction pads on its feet which enable it to stay upside down on the ceiling. What can we humans do to overcome **g**? We can go a long way towards it by not always beginning with the traditional materials but by thinking in terms of lightness and exploring the great possibilities in the new light alloys that have been developed by H.D.A. Next time you have a production problem . . .

. . . make light work of **it** with **HIGH DUTY ALLOYS**
