CONTENTS

PAGE

Ashauer, S. On the self-accelerating electron 506

Batchelor, G. K. Kolmogoroff's theory of locally isotropic turbulence 533

Besicovitch, A. S. Corrigenda to the paper A general form of the covering principle and relative differentiation of additive functions. II 590

Bondi, H. Waves on the surface of a compressible liquid 75

Chang, T. S. A note on relativistic second quantization 183

—— A note on the Hamiltonian theory of quantization. II 196

Clark, G. L. The gravitational field of a rotating cohesive system 164

—— Note on the velocity of propagation of gravitation 178

Conn, G. K. T. Optical theory of the echelette grating 240

Coulson, C. A. Note on the random-walk problem 583

Crank, J. and **Nicholson, P.** A practical method for numerical evaluation of solutions of partial differential equations of the heat conduction type 50

Davenport, H. On the product of three non-homogeneous linear forms 137

Davies, E. T. The theory of surfaces in a geometry based on the notion of area . . 307

Dean, W. R. Note on waves on the surface of running water 96

—— and **Wilson, A. H.** A note on the theory of dislocation in metals 205

Domb, C. The problem of random intervals on a line 329

—— The resultant of a large number of events of random phase. II 587

Dunworth, J. V. and **Pontecorvo, B.** Excitation of indium 113 by X-rays . . . 123

—— —— X-ray excitation of lutecium 429

Edmonds, Sheila M. The Parseval formulae for monotonic functions. I 289

Feather, N. and **Krishnan, R. S.** The radiations emitted by $^{229}_{92}U$, and its formation in the deuteron bombardment of uranium 267

Friedlander, F. G. Geometrical optics and Maxwell's equations 284

—— On the integrals of a partial differential equation 348

—— Simple progressive solutions of the wave equation 360

Green, A. E. The flexure and torsion of aeolotropic beams 68

Guinand, A. P. Integral modular forms and summation formulae 127

Haden, H. G. A note on the distribution of the different orderings of n objects . . 1

Hardy, G. H. and **Rogosinski, W. W.** Notes on Fourier series (IV): Summability (R_2) 10

Harish-Chandra. On the algebra of the meson matrices 414

Hayman, W. K. Some remarks on Schottky's theorem 442

Hodge, W. V. D. Note on the conditions for a p-cycle of an algebraic manifold to be of rank k 577

Hu, Sze-Tsen. On homotropy and deformation retracts 314

Littlewood, D. E. An equation of quantum mechanics 406

Macfarlane, G. G. A variational method for determining eigenvalues of the wave equation applied to tropospheric refraction 213

https://doi.org/10.1017/S0305004100023689 Published online by Cambridge University Press

PAGE

Miller, A. R. The heat of adsorption of diatomic molecules 232

—— Configurations of closed ring molecules 422

Milne-Thompson, L. M. Stress in an infinite half-plane 287

Mirsky, L. On the number of representations of an integer as the sum of three r-free integers 433

Moran, P. A. P. Random associations on a lattice 321

Oldroyd, J. G. A rational formulation of the equations of plastic flow for a Bingham solid 100

—— Two-dimensional plastic flow of a Bingham solid. A plastic boundary-layer theory for slow motion 383

—— Rectilinear plastic flow of a Bingham solid. I. Flow between eccentric circular cylinders in relative motion 396

—— Rectilinear plastic flow of a Bingham solid. II. Flow between confocal elliptic cylinders in relative motion 521

Pedoe, D. On a new analytical representation of curves in space 455

Pitt, H. R. On a class of linear integro-differential equations 153

Quenouille, M. H. On the problem of random flights 581

Rao, Radhakrishna, C. Minimum variance and the estimation of several parameters 280

Reekie, J. Note on the structure of liquid helium II 262

Shanmugadhasan, S. On the theory of spinning particles 106

Shoenberg, D. A note on Talbot's bands 130

—— A note on white light fringes 134

Sondheimer, E. H. Demagnetizing coefficients and hysteresis losses of rectangular iron-silicon strips 254

—— The theory of the thermoelectric power of metals 571

Temperley, H. N. V. Time effects in the magnetic cooling method. II . . . 118

Todd, J. A. Combinants of a pencil of quadric surfaces. I 475

—— Combinants of a pencil of quadric surfaces. II 488

Townsend, A. A. The measurement of double and triple correlation derivatives in isotropic turbulence 560

Tutte, W. T. A ring in graph theory 26

—— A family of cubical graphs 459

Tweedie, M. C. K. Functions of a statistical variate with given means, with special reference to Laplacian distributions 41

Ursell, F. The effect of a fixed vertical barrier on surface waves in deep water . . 374

Verblunsky, S. On the initial moments of a bounded function 275

Walters, A. G. The distribution of projected areas of fragments 342

Watson, A. G. D. On the geometry of the wave equation 491

de Wet, J. S. Symmetric energy-momentum tensors in relativistic field theories . . 511

Wilkes, M. V. and **Ramsay, J. A.** A theory of the performance of radar on ship targets 220

PROCEEDINGS 591

STATEMENT OF ACCOUNTS 594
