

Contents volume 86

Contents volume 86, No. 1

Special Issue | Fluvial Sedimentology

Preface	1
Esther Stouthamer and Wilfried ten Brinke	
The alluvial architecture of the Coevorden Field (Upper Carboniferous), the Netherlands	3
H. Kombrink, J. Bridge & E. Stouthamer	
New prospects in geomorphological and geological mapping of the Rhine-Meuse Delta – Application of detailed digital elevation maps based on laser altimetry	15
H.J.A. Berendsen & K.P. Volleberg	
Architecture of the Holocene Rhine-Meuse delta (the Netherlands) – A result of changing external controls	23
M.J.P. Gouw & G. Erkens	
Ground-penetrating radar profiling on embanked floodplains	55
M.A.J. Bakker, D. Maljers & H.J.T. Weerts	
The influence of floodplain morphology and river works on spatial patterns of overbank deposition	63
I. Thonon, H. Middelkoop & M. van der Perk	
On the use of flexible spillways to control the discharge ratio of the Rhine in the Netherlands: hydraulic and morphological observations	77
R.M.J. Schielen, P. Jesse & L.J. Bolwidt	

Contents volume 86, No. 2

Eemian marine mollusks and barnacles from Ristinge Klint, Denmark – Hydrodynamics and oxygen deficiency	95
Jan K. Nielsen, S. Helama, D. Rodland & Jesper K. Nielsen	
Clay resources in the Netherlands	117
M.J. van der Meulen, D. Maljers, S.F. van Gessel & S.H.L.L. Gruijters	
Towards an improved lithostratigraphic subdivision of the Chalk Group in the Netherlands North Sea area – A seismic stratigraphic approach	131
A.S. van der Molen & Th.E. Wong	
Geo(Im)pulse An investigation into the genesis of an erratic (retro) eclogite block from Haren, Groningen, the Netherlands	143
J. Langendoen & H.L.M. van Roermund	
Erratum	159

Contents volume 86, No. 3

Special Issue | Geomorphology and Climate – In honour of Professor Dr Eduard A. Koster

Editorial	161
H. Middelkoop, E. Stouthamer & W.Z. Hoek	
History of geological mapping of the Holocene Rhine-Meuse delta, the Netherlands	165
H.J.A. Berendsen	
Luminescence dating of Netherlands' sediments	179
J. Wallinga, F. Davids & J.W.A. Dijkmans	
Introduction of the Bostel Formation and implications for the Quaternary lithostratigraphy of the Netherlands	197
J. Schokker, H.J.T. Weerts, W.E. Westerhoff, H.J.A. Berendsen & C. den Otter	
Alluvial architecture of fluvio-deltaic successions: a review with special reference to Holocene settings	211
M.J.P. Gouw	
Radiometric fingerprinting of fluvial sediments in the Rhine-Meuse delta, the Netherlands – a feasibility test	229
K. Hebinck, H. Middelkoop, N. van Diepen, E.R. van der Graaf & R.J. de Meijer	
Aeolian and fluviolacustrine landforms and prehistoric human occupation on a tectonically influenced floodplain margin, the Méma, central Mali	241
B. Makaske, E. de Vries, J.A. Tainter & R.J. McIntosh	
Downstream changes of meandering styles in the lower reaches of the River Vecht, the Netherlands	257
H.P. Wolfert & G.J. Maas	
Opposite hysteresis of sand and gravel transport upstream and downstream of a bifurcation during a flood in the River Rhine, the Netherlands	273
M.G. Kleinans, A.W.E. Wilbers & W.B.M. ten Brinke	
Diagnostic sedimentary structures of the fluvial-tidal transition zone – Evidence from deposits of the Rhine and Meuse	287
J.H. van den Berg, J.R. Boersma & A. van Gelder	
A Dutch geoscience perspective on the Katrina disaster	307
T.E. Törnqvist	

Contents volume 86, No. 4

The stratigraphy of the Neogene-Quaternary succession in the southwest Netherlands from the Schelphoek borehole (42G4-11/42G0022) – a sequence-stratigraphic approach A.A. Slupik, F.P. Wesselingh, A.C. Janse & J.W.F. Reumer	317
New groundwater-level rise data from the Rhine-Meuse delta – implications for the reconstruction of Holocene relative mean sea-level rise and differential land-level movements H.J.A. Berendsen, B. Makaske, O. van de Plassche, M.H.M. van Ree, S. Das, M. van Dongen, S. Ploumen & W. Schoenmakers	333
Dendrogeomorphology – a new tool to study drift-sand dynamics J. den Ouden, U.G.W. Sass-Klaassen & P. Copini	355
Baltic Ordovician compound sponges as erratics on Gotland (Sweden), in northern Germany and the eastern Netherlands F. Rhebergen	365
Earliest Jurassic (Hettangian) psiloceratoid ammonites from a subsidence pipe at Winterswijk, the eastern Netherlands A.A. Klompmaker & B.J.H.M. van den Berkmortel	379
Facies architecture of heterolithic tidal deposits: the Holocene Holland Tidal Basin M.E. Donselaar & C.R. Geel	389
Reservoir modelling of heterolithic tidal deposits: sensitivity analysis of an object-based stochastic model C.R. Geel & M.E. Donselaar	403
