Legal

INFORMATION MANAGEMENT

- **Big Brother in your library?**
- **Disability discrimination**
- **E-government**
- **Lawpaths, Lawbore and more...**

Search less • Find more

Wouldn't it be great if you could rely on a legal information service that really works for you?

Westlaw UK's Locator service is the only in-context legal research tool that provides links to every single related source with a non-publisher bias. The Locator service details the case summary, links to full text, cited cases and legislation as well as the entire history of the case and provides you with everything you need to know about a case on a single page.

An in-depth, timesaving research tool complemented by a check listing process from leading experts, the Locator service replaces the frustration of searching for related legal information as the searching is done for you.

For peace of mind in legal research, choose a partner who ensures you spend less time searching and more time finding.
