TIPOGRAFIA VATICANA

**ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE: TWIN RESEARCH** will accept original investigations, case reports, short notes, and letters to the editor. Authors who wish to submit review articles should first contact the editor's office. Manuscripts and all editorial correspondence should be sent to the Editor, Gregor Mendel Institute, Piazza Galeno 5, 00161 Rome, Italy.

**Manuscripts:** All manuscripts must be in English. Authors whose "first" language is not English should arrange for their manuscripts to be written in idiomatic English prior to submission. Submit the original and two clear copies of all elements (including tables and figures) typed on one side of good quality 22×28 cm (8½"×11") paper with at least 30 mm (1") margins. Double space everything. Start a new page for each major division of the manuscript. Number all pages in sequence beginning with the title page. Arrange the copy in the following order:

**Title page:** This should contain the complete article title, names and affiliations of all authors, institution at which the work was performed, acknowledgments of funding, name and address for all correspondence, and a running head of not more than 45 characters.

**Abstract:** This should summarize the major findings and conclusions in the paper in not more than 200 words preferably compressed into a single paragraph.

**Key words:** Submit six to twelve key words or phrases that will adequately index the subject matter of the article.

**Text:** The text should follow the format: Introduction, Materials and Methods (or, for clinical reports, Case History), Results, Discussion, Conclusions, and Acknowledgments. Use subheadings and paragraph titles whenever possible. Avoid footnotes whenever possible. Place statements that might be appropriate for footnotes to text, inside parentheses, within the text. For abbreviations, follow the guidelines in Council of Biology Editors Style Manual, 4th Edition (available from the American Institute of Biological Sciences, 3900 Wisconsin Avenue NW, Washington, DC 20016, USA). Define all unusual abbreviations at first mention. Units of measure must be abbreviated according to the International System of Units (SI) based on the metric system.

**References:** In the text, references should be cited as numerals in brackets. The final list should first be alphabetized and then numbered and include only references cited in the text. They must include names of all authors, complete title of the work cited, and inclusive page numbers. Abbreviate periodical titles according to the bibliographic Guide for Editors and Authors (BIOSIS et al, 1974). If there are particular problems with the reference system, authors can make special arrangements with the editor. In the following examples, note the punctuation, capitalization, and order of information:

1. Borgeonkar DS (1977): "Chromosomal Variation in Man: A Catalog of Chromosomal Variants and Anomalies, 2nd Ed." New York: Alan R. Liss.
2. Perez GL, Kelth L (1978): Electrocardiograms of twins. In Nance WE, Allen G, Parisi P (eds): "Twin research: Part C, Clinical Studies." New York: Alan R. Liss, pp. 39-48.
3. Wiener AS (1977): Blood group mythology. Present status. *Acta Genet Med Gemellol* 26: 3-15.

**Tables:** Each table must be typed on a separate page, be numbered in order of appearance with Arabic numerals, have a title, and be keyed into the text.

**Illustrations:** Use illustrations sparingly; They should not duplicate information already made clear in the text. When possible, they should be grouped as plates. Glossy black and white photographs 5"×7" or 8½"×10" in size are preferred (a charge will be made for color). All lettering must meet professional standards and be legible after reduction in size. Illustrations must be numbered in order of appearance with Arabic numerals and be keyed into the text. Name of author, figure number, and an arrow indicating orientation should be typed on a gummed label and affixed to the back of each illustration.

**Legends:** A legend must accompany each illustration and must define all abbreviations used therein.

All manuscripts submitted to **ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE: TWIN RESEARCH** must be the original results of the author's own work. They must be submitted solely to this Journal, may not have been published in any part or form (except as a meeting abstract) in another publication of any type, professional or lay, and become the property of the publisher. Any material reproduced or adapted from any other published or unpublished source must be duly acknowledged. It is the author's responsibility to obtain permission to reproduce copyrighted material. Upon acceptance of a manuscript for publication, the author will be requested to sign an agreement transferring copyright to the publisher, who reserves copyright. No published material may be reproduced or published elsewhere without the written permission of the publisher and the author. The journal will not be responsible for the loss of manuscripts at any time. All statements in, or omissions from, published manuscripts are the responsibility of the authors.

**Electronic mailing:** In order to speed up the revising process of the scientific works submitted, the editorial office can receive floppy magnetic media or e-mail with attached file of the articles. The file formats accepted are Microsoft Write, WinWord 2.0/6.0, Word Perfect, Ami Pro, WordStar 4.0 or superior. Document files will be accepted if enclosed with a first page containing the request and/or the proposal of publishing addressed as above. E-mail: mendel@mclink.it

**CONTENTS**

- 185 Perinatal Morbidity and Mortality Rates in Twin Pregnancies – A 15 – Year Review Study from Athens**  
by A.E. Liapis, D.K. Hassiakos, P.P. Panagopoulos
- 193 Absence of Pericentromeric Heterochromatin (9qh-) in a Patient with Bilateral Retinoblastoma**  
by T.A. Sivakumaran, S. Ghose, H. Kumar, U. Singha, K. Kucheria
- 199 Ultrasound Examination in Twin Pregnancy and Late Fetal Death**  
by H. Rydhstroem, B. Walles
- 209 Trend of Twinning Rates in Ten Countries, 1972-1996**  
by Y. Imaizumi
- 219 “Mother’s Child” and “Father’s Child” Among Twins – A longitudinal twin study from pregnancy to 21 years age, with special reference to development and psychiatric disorders**  
by I. Moilanen, P. Pennanen
- 231 Breve Storia del Metodo Gemellare**  
by F. Lorenzi
- 241 Balanced X; 22 Translocation in a Patient with Premature Ovarian Failure**  
by N. Banerjee, A. Kriplani, D. Takkar, K. Kucheria
- 247 Author Index to Volume 46**
- 249 Subject Index to Volume 46**
