

AUTHOR INDEX FOR VOLUME 100

ACCIARRI, C. and LUCCHINI, A.; The generating graph of infinite abelian groups	68
AKHLAGHI, Z.; see SAYANJALI, Z.	428
ARIKATLA, S. R.; see KOLEY, B.	41
ARNOLD, L. and LE MERDY, C.; New counterexamples on Ritt operators, sectorial operators and R -boundedness	498
BAIER, S., LYNCH, S. B. and ZHAO, L.; A lower bound for the large sieve with square moduli	225
BARNESLEY, M. F. and MIHALACHE, N.; Symmetric itinerary sets	97
BAU, S. and LEI, Y.; Bisectors in vector groups over integers	353
BAYATI, S., JAHANI, I. and TAGHIPOUR, N.; Linear quotients and multigraded shifts of Borel ideals	48
BHAVE, A. and BORA, L.; On the Selmer group of a certain p -adic Lie extension	245
BORA, L.; see BHAVE, A.	245
BREUER, F.; Periods of Ducci sequences and odd solutions to a Pellian equation	201
CAMERON, K., HUANG, S. and MERKEL, O.; A bound for the chromatic number of (P_5, gem) -free graphs	182
CASELLA, A.; Branched Cauchy–Riemann structures on once-punctured torus bundles	173
CHEN, C., KERR, B. and MOHAMMADI, A.; A new sum–product estimate in prime fields	268
CHEN, F.; see LIN, J.	13
CHEN, G.; Estimates of the second derivative of bounded analytic functions	458
CHEN, X. and LEWIS, M. L.; Monolithic Brauer characters	434
CHEN, X. and LEWIS, M. L.; Squares of degrees of Brauer characters and monomial Brauer characters	58
CHERN, S.; Note on sums involving the Euler function	194
CHO, N. E., KOWALCZYK, B. and LECKO, A.; Sharp bounds of some coefficient functionals over the class of functions convex in the direction of the imaginary axis	86
DE MELO, E. and SHUMYATSKY, P.; Fitting subgroup and nilpotent residual of fixed points	61
DHARMADASA, H. K. and MORAN, W.; A generalisation of the Frobenius reciprocity theorem	317
DING, Y. and SUN, Y.-C.; A note on the sum of reciprocals	189
DOUST, I.; A note on positive \mathcal{AN} operators	129
DRAGOMIR, S. S.; Lipschitz-type inequalities for analytic functions in Banach algebras	489
EAST, J. and NILES, R.; Integer polygons of given perimeter	131

FAN, L.; see GENG, X.	419
GENG, X., FAN, L. and MA, X.; Diameter of commuting graphs of symplectic algebras	419
GHADERMARZI, A.; On the factorisation of $x^2 + D$	206
GONZÁLEZ, A. and LÓPEZ-LÓPEZ, J. L.; Spaces of special quadrilaterals	155
HADWIN, D., LI, W., LIU, W. and SHEN, J.; A characterisation of tracially nuclear C^* -algebras	119
HARDING, B.; Symmetric itinerary sets: algorithms and nonlinear examples	109
HAYTHORPE, M. and NEWCOMBE, A.; On the crossing number of the Cartesian product of a sunlet graph and a star graph	5
HUANG, S.; see CAMERON, K.	182
JAHANI, I.; see BAYATI, S.	48
JONES, L.; A brief note on some infinite families of monogenic polynomials	239
KANEKO, M., OYAMA, K. and SAITO, S.; Analogues of the Aoki–Ohno and Le–Murakami relations for finite multiple zeta values	34
KERR, B.; see CHEN, C.	268
KHOI, V. T.; On the probability distribution of the product of powers of elements in compact Lie groups	440
KHOSRAVI, B.; see SAYANJALI, Z.	428
KOLEY, B. and ARIKATLA, S. R.; Cyclotomic factors of Borwein polynomials	41
KOWALCZYK, B.; see CHO, N. E.	86
KRYCZKA, A.; A quantitative extension of Szlenk’s theorem	338
LAOHAKOSOL, V.; see PONPETCH, K.	304
LATERVEER, R.; A remark on the Chow ring of Küchle fourfolds of type $d3$	410
LÊ, Q. T., NGUYEN, L. P. H. and PHO, D. T.; On complex homogeneous singularities	395
LE MERDY, C.; see ARNOLD, L.	498
LECKO, A.; see CHO, N. E.	86
LEI, Y.; see BAU, S.	353
LEWIS, M. L.; see CHEN, X.	434
LEWIS, M. L.; see CHEN, X.	58
LI, W.; see HADWIN, D.	119
LIN, J., ZENG, Q. and CHEN, F.; Maximum cuts in graphs without wheels	13
LIU, K. and YU, P.; A note on the periodicity of entire functions	290
LIU, W.; see HADWIN, D.	119
LOO, S. L.; Mathematical modelling of the evolution of human behaviours and strategic choice	523
LÓPEZ-LÓPEZ, J. L.; see GONZÁLEZ, A.	155
LOXTON, J. H.; Editorial: A centenary of the Bulletin of the Australian Mathematical Society	1
LU, K. W.; Weak subordination of multivariate Lévy processes	518
LUCCHINI, A.; see ACCIARRI, C.	68
LYNCH, S. B.; see BAIER, S.	225

MA, X.; see GENG, X.	419
MAHMOODI, A.; see ZIAMANESH, M.	479
MASTROSTEFANO, D.; Positive proportion of short intervals containing a prescribed number of primes	378
MAVECHA, S.; see PONPETCH, K.	304
MCCULLOUGH, M. H.; Nonlinear time series analysis using ordinal networks with select applications in biomedical signal processing	170
MERKEL, O.; see CAMERON, K.	182
MIHALACHE, N.; see BARNSLEY, M. F.	97
MOHAMMADI, A.; see CHEN, C.	268
MOHAPATRA, M. R., WANG, X. and ZHU, J.-F.; Boundary Schwarz lemma for solutions to nonhomogeneous biharmonic equations	470
MONETTA, C. and TORTORA, A.; A nilpotency criterion for some verbal subgroups	281
MORAN, W.; see DHARMADASA, H. K.	317
MOREE, P. and SHA, M.; Primes in arithmetic progressions and nonprimitive roots	388
MORRIS, S. A.; A remark on the separable quotient problem for topological groups	453
NEWCORBE, A.; see HAYTHORPE, M.	5
NGUYEN, H. B. Q.; see TRAN, K. T.	344
NGUYEN, L. P. H.; see LÊ, Q. T.	395
NILES, R.; see EAST, J.	131
NOLAN, M.; Geometry of integrable lattice equations and their reductions	168
OYAMA, K.; see KANEKO, M.	34
PAWLAK, R. J. and POPRAWA, J.; On generators and disturbances of dynamical systems in the context of chaotic points	76
PHO, D. T.; see LÊ, Q. T.	395
PONPETCH, K., LAOHAKOSOL, V. and MAVECHA, S.; A system of functional equations satisfied by components of a quadratic function and its stability	304
POPRAWA, J.; see PAWLAK, R. J.	76
PRABHU, N.; see RAM MURTY, M.	27
PRASAD, R.; Streamflow and soil moisture forecasting with hybrid data intelligent machine learning approaches: case studies in the Australian Murray–Darling basin	520
RAM MURTY, M. and PRABHU, N.; The error term in the Sato–Tate theorem of Birch	27
REIS, L.; On the dimension of permutation vector spaces	256
SAITO, S.; see KANEKO, M.	34
SANDERS, T.; Schur’s colouring theorem for noncommuting pairs	446
SAYANJALI, Z., AKHLAGHI, Z. and KHOSRAVI, B.; On the regularity of character degree graphs	428

SHA, M.; see MOREE, P.	388
SHEN, J.; see HADWIN, D.	119
SHOJAEI, B.; see ZIAMANESH, M.	479
SHULMAN, T. and UUYE, O.; Approximations of subhomogeneous algebras	328
SHUMYATSKY, P.; see DE MELO, E.	61
SINGH, S. and ZELENYUK, Y.; Alternating colourings of the vertices of a regular polygon	177
STEINERBERGER, S.; A compactness principle for maximising smooth functions over toroidal geodesics	148
SUN, Y.-C.; see DING, Y.	189
TAGHIPOUR, N.; see BAYATI, S.	48
TANG, D.; Vanishing coefficients in four quotients of infinite product expansions	216
TIAN, L.; see WANG, Y.	323
TORTORA, A.; see MONETTA, C.	281
TRA, K. Q.; see TRAN, K. T.	344
TRAN, K. T., TRAN, L. N., NGUYEN, H. B. Q. and TRA, K. Q.; Recovery of the temperature distribution in a multilayer fractional diffusion equation	344
TRAN, L. N.; see TRAN, K. T.	344
UUYE, O.; see SHULMAN, T.	328
WANG, L.-Y. and WU, H.-L.; Applications of Lerch's theorem to permutations of quadratic residues	362
WANG, X.; see MOHAPATRA, M. R.	470
WANG, Y. and TIAN, L.; A note on radial symmetry for an integral equation of Wolff type	323
WATSON, N. A.; Extendable temperatures	297
WU, H.-L.; see WANG, L.-Y.	362
YU, P.; see LIU, K.	290
ZAPATA, C. A. I.; Category and topological complexity of the configuration space $F(G \times \mathbb{R}^n, 2)$	507
ZELENYUK, Y.; see SINGH, S.	177
ZENG, Q.; see LIN, J.	13
ZHANG, Y.; A note on matrix approximation in the theory of multiplicative Diophantine approximation	372
ZHAO, L.; see BAIER, S.	225
ZHOU, N. H.; On the distribution of the rank statistic for strongly concave compositions	230
ZHU, J.-F.; see MOHAPATRA, M. R.	470
ZIAMANESH, M., SHOJAEI, B. and MAHMOODI, A.; Essential amenability of dual Banach algebras	479

INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website www.austms.org.au/Bulletin. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in \LaTeX using $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX packages and submitted as a PDF file via our journal management system, at www.austms.org.au/Publications/Submissions/BAustMS. This permits authors to track their papers through the editorial process. Recent versions of \TeX are able to produce PDF files directly. A \LaTeX class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at editor@bulletin.austms.org.au.

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification and Key Words. Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at www.ams.org/msc.

4. Abstracts of PhD Theses. The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Table of Contents

Bisectors in vector groups over integers <i>Bau, S. & Lei, Y.</i>	353
Applications of Lerch's theorem to permutations of quadratic residues <i>Wang, L.-Y. & Wu, H.-L.</i>	362
A note on matrix approximation in the theory of multiplicative Diophantine approximation <i>Zhang, Y.</i>	372
Positive proportion of short intervals containing a prescribed number of primes <i>Mastrostefano, D.</i>	378
Primes in arithmetic progressions and nonprimitive roots <i>Moree, P. & Sha, M.</i>	388
On complex homogeneous singularities <i>Lê, Q. T., Nguyen, L. P. H. & Pho, D. T.</i>	395
A remark on the Chow ring of K�uchle fourfolds of type $d3$ <i>Laterveer, R.</i>	410
Diameter of commuting graphs of symplectic algebras <i>Geng, X., Fan, L. & Ma, X.</i>	419
On the regularity of character degree graphs <i>Sayanjali, Z., Akhlaghi, Z. & Khosravi, B.</i>	428
Monolithic Brauer characters <i>Chen, X. & Lewis, M. L.</i>	434
On the probability distribution of the product of powers of elements in compact Lie groups <i>Khoi, V. T.</i>	440
Schur's colouring theorem for noncommuting pairs <i>Sanders, T.</i>	446
A remark on the separable quotient problem for topological groups <i>Morris, S. A.</i>	453
Estimates of the second derivative of bounded analytic functions <i>Chen, G.</i>	458
Boundary Schwarz lemma for solutions to nonhomogeneous biharmonic equations <i>Mohapatra, M. R., Wang, X. & Zhu, J.-F.</i>	470
Essential amenability of dual Banach algebras <i>Zamanesh, M., Shojaaee, B. & Mahmoodi, A.</i>	479
Lipschitz-type inequalities for analytic functions in Banach algebras <i>Dragomir, S. S.</i>	489
New counterexamples on Ritt operators, sectorial operators and R-boundedness <i>Arnold, L. & Le Merdy, C.</i>	498
Category and topological complexity of the configuration space $F(G \times \mathbb{R}^n, 2)$ <i>Zapata, C. A. I.</i>	507
Abstracts of PhD Theses	
Weak subordination of multivariate L�vy processes <i>Lu, K. W.</i>	518
Streamflow and soil moisture forecasting with hybrid data intelligent machine learning approaches: case studies in the Australian Murray–Darling basin <i>Prasad, R.</i>	520
Mathematical modelling of the evolution of human behaviours and strategic choice <i>Loo, S. L.</i>	523
Author Index for Volume 100	525
