STAR FORMATION

INTERNATIONAL ASTRONOMICAL UNION
UNION ASTRONOMIQUE INTERNATIONALE

SYMPOSIUM No. 75
HELD IN GENEVA, SWITZERLAND,
SEPTEMBER 6-10, 1976

STAR FORMATION

EDITED BY

T. DE JONG

Astronomical Institute, University of Amsterdam, The Netherlands

AND

A. MAEDER

Observatoire of Genève, Sauverny, Switzerland

D. REIDEL PUBLISHING COMPANY

DORDRECHT-HOLLAND / BOSTON-U.S.A.

1977

Library of Congress Cataloging in Publication Data

Main entry under title:

Star formation.

(I.A.U. symposia; 75)

At head of title: International Astronomical Union.

“Dedicated to the memory of Solomon Borisovich Pikel’ner.”

Papers and discussions of the IAU symposium organized and sponsored by its Commissions 34 and 35.

Includes bibliographical references.

1. Stars—Evolution—Congresses. I. Jong, Teive de, 1942—
II. Maeder, A., 1942— III. Pikel’ner, Solomon Borisovich. IV. International
Astronomical Union. Commission 34. V. International Astronomical Union.
Commission 35. VI. Series: International Astronomical Union. Symposium; no. 75.

Printed in The Netherlands

Dedicated to the memory of

SOLOMON BORISOVICH PIKEL'NER

(Baku February 6, 1921 - Moscow November 19, 1975)

who until his untimely death served as a member of the Scientific Organizing Committee of this Symposium. Many of his contributions to astrophysics resulted in a better understanding of star formation.

TABLE OF CONTENTS

PREFACE	XI
LIST OF PARTICIPANTS	XIII
INTRODUCTION / L. Spitzer, Jr.	1
STAR FORMATION AND THE GALAXY / F. J. Kerr	3
1. Introduction	3
2. Formation of galaxies and halo stars	3
3. Distribution of gas in galactic disk	5
4. Clumps and clusters	9
5. Density-wave theory	10
6. Compression mechanisms	11
7. Observational tests of density waves and star formation	13
8. Rate of star formation	15
9. Solar neighborhood and other special regions	17
10. Summary	18
DISCUSSION FOLLOWING REVIEW BY F.J. KERR	20
Scenarios of star formation, metal enrichment, compression mechanisms	20
Molecular clouds as tracers of spiral structure	32
MOLECULAR CLOUDS / P. Thaddeus	37
1. Introduction	37
2. Molecular clouds are CO clouds	37
3. Some recent observations	46
DISCUSSION FOLLOWING REVIEW BY P. THADDEUS	55
HII regions, molecular clouds and young stellar groups	56
KINEMATICS AND DYNAMICS OF DENSE CLOUDS / J. Lequeux	69
1. Introduction	69
2. Orders of magnitude for gravitational instability and collapse; predictions of line profiles	70
3. Comparison of cloud models with observations	73
4. Masers in molecular clouds: generalities on pumping mechanisms and physical conditions	82
5. Masers in molecular clouds: relationship with protostars	88
DISCUSSION FOLLOWING REVIEW BY J. LEQUEUX	95
Fragmentation, collapse and turbulence	95
Maser sources associated with star formation	99
INFRARED OBSERVATIONS OF STAR FORMATION REGIONS /	
C. G. Wynn-Williams	105
1. Introduction	105

2. Progress in infrared observations	109
3. Recent studies of some particular regions	113
4. Conclusions	115
DISCUSSION FOLLOWING REVIEW BY C.G. WYNN-WILLIAMS	119
Hot molecular hydrogen in Orion	119
Far-infrared observations of Orion	121
Ionization fronts in Orion	122
The ρ Ophiuchi cloud	125
Miscellaneous contributions	127
RADIO OBSERVATIONS RELATED TO STAR FORMATION / P. G. Mezger and L. F. Smith	133
I. An overview	133
II. Radio observations related to the formation of single stars and star clusters	140
III. Star formation rates in the galaxy	154
DISCUSSION FOLLOWING REVIEW BY P.G. MEZGER AND L.F. SMITH	164
Do low-mass stars form first?	164
Dependence of the rate of star formation on gas density	169
Small-scale structure inside HII regions	173
EARLY STAGES OF STELLAR EVOLUTION / S. E. Strom	179
1. The Herbig Ae and Be stars associated with nebulosity (HES)	180
2. The T Tauri stars	183
3. The Herbig-Haro objects	190
4. A scenario for pre-main sequence evolution	194
DISCUSSION FOLLOWING REVIEW BY S.E. STROM	198
Herbig-Haro objects	201
Rotation, inflow/outflow and radial velocities of pre-main sequence stars	203
Miscellaneous short contributions	209
THEORETICAL PROCESSES IN STAR FORMATION / L. Mestel	213
1. Introduction: fragmentation versus dissipation	213
2. Gravitational collapse: the role of the galactic magnetic field	215
3. Magnetic fragmentation	217
4. Rotating magnetic clouds	219
5. The flux-freezing approximation	223
6. Weakly magnetic, rotating systems	225
7. The limit of fragmentation and the initial mass spectrum	227
DISCUSSION FOLLOWING REVIEW BY L. MESTEL	233
Magnetic fields, angular momentum and fragmentation of clouds	233
Minimum Jeans mass and initial mass function of stars	240
Observations of magnetic fields related to star formation	243
COLLAPSE DYNAMICS AND COLLAPSE MODELS / R. B. Larson	249
1. Introduction	249
2. The collapse problem	249
3. Spherical collapse	251

4. Axisymmetric collapse	252
5. Three-dimensional collapse	255
6. Evolution of protostellar cores	258
7. Protostellar envelopes and observed properties	262
8. Summary	264
DISCUSSION FOLLOWING REVIEW BY R.B. LARSON	268
Short contributions	277
SUMMARY OF THE CONFERENCE: OBSERVATIONS / G. H. Herbig	283
ON WHY WE NEED A GOOD THEORY OF A STAR FORMATION / D. Lynden-Bell	291
