

CAMBRIDGE

The Cambridge RF and Microwave Engineering Series

Phase Noise and Frequency Stability in Oscillators

Enrico Rubiola *FEMTO-ST Institute, Université de Franche Comté, Besançon*

- Includes numerous practical examples, including case studies taken from laboratory prototypes and commercial oscillators
- Covers the reverse engineering of oscillators based on phase-noise spectra
- Additional materials available online

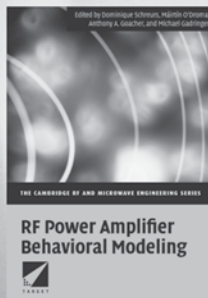

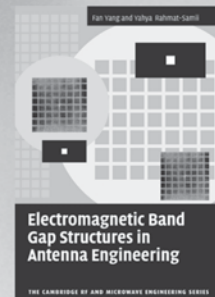

GBP 55.00 | HB | 9780521886772 | 2008

Electromagnetic Band Gap Structures in Antenna Engineering

Fan Yang *The University of Mississippi*
Yahya Rahmat-Samii *University of California, Los Angeles*

- Includes a wealth of practical examples and design details
- Introduces a customized FDTD method for EBG analysis
- Electromagnetic software for EBG design is provided online

GBP 50.00 | HB | 9780521889919 | 2008

RF Power Amplifier Behavioral Modeling

Dominique Schreurs *Katholieke Universiteit Leuven, Belgium*
Máirtín O'Droma *University of Limerick*
Anthony A. Goacher *University of Limerick*
Michael Gadringer *Technische Universität Wien, Austria*

This review of nonlinear theory and power amplifier modelling techniques is a one-stop reference for engineers working in PA modelling, or RF designers using such models. It includes a detailed treatment of nonlinear theory, together with chapters on memory effects, implementation in commercial circuit simulators, and validation.

GBP 50.00 | HB | 9780521881739 | 2008

CAMBRIDGE
UNIVERSITY PRESS

INTERNATIONAL JOURNAL OF

MICROWAVE AND WIRELESS TECHNOLOGIES**CONTENTS**

• Introduction	1	• A correlation of capacitive RF-MEMS reliability to AlN dielectric film spontaneous polarization	43
• Foreword	3	Eleni Papandreou, George Papaioannou, Tomas Lisec	
ORIGINAL ARTICLES			
• Vertical displacement detection of an aluminum nitride piezoelectric thin film using capacitance measurements	5	• Piezo-controlled microwave devices	49
Mahmoud Al Ahmad, Robert Plana		Yuriy M. Poplavko, Vitaliy I. Molchanov, Yuriy I. Yakimenko	
• Methodology for designing microwave acoustic filters with Butterworth/Chebyshev response	11	• A semi-lumped microstrip UWB bandpass filter	57
Óscar Menéndez, Pedro De Paco, Joan Gemio, Jodi Verdú, Edén Corrales		Darine Kaddour, Jean-Daniel Arnould, Philippe Ferrari	
• Piezoelectric materials parameters for piezoelectric thin films in GHz applications	19	• Criteria for the evaluation of linear two-port stability using two geometrically derived parameters	65
P. Muralt, J. Conde, A. Artieda, F. Martin, M. Cantoni		Chinchun Meng, Hung-Ju Wei, Po-Hsing Sun	
• High-frequency monolithic thin-film piezoelectric-on-substrate filters	29	• Mitigation of wideband interference on UWB-IR transmission using multi-carrier templates	73
Reza Abdolvand, Farrokh Ayazi		Madan Kumar Lakshmanan, Homayoun Nikookar	
• Lithographical bending control method for a piezoelectric actuator	37	• Improved IP ₂ calibration method using a perturbation-based algorithm	83
Tamio Ikehashi, Etsuji Ogawa, Hiroaki Yamazaki, Tatsuya Ohguro		Karim Aoulad Ali, Philippe Barré, Guillaume Andrieux, Jean-François Diouris
