

Phenom-World

At Phenom-World, we believe breakthroughs happen when complex nano technology is made intuitive, easier to use and brought within reach. As the No. 1 global supplier of desktop scanning electron microscopes, our aim is to make imaging and analysis at the nano scale available to every scientist in every lab.

Free to achieve

We use the latest technology to ensure that our customers get fast, accurate results to help them achieve more. The robust Phenom desktop systems offer the high-resolution, high-quality imaging and analysis that is required in a wide variety of applications. What's more, they are recognized the world over for their ease of use, speed, and reliability.

Innovative thinking

We create high quality technology that has an impact on how people work, giving them the freedom to push boundaries. It takes innovative thinking, collaborative working, and an entrepreneurial attitude.

Achieve more with the latest Phenom products

Now we have improved our products even further:

- **Phenom Pro Generation 5** — For fast and excellent imaging.
- **Phenom ProX Generation 5** — The high-performance desktop SEM.
- **Phenom XL** — The desktop SEM for large samples and automation.
- **Phenom GSR** — Automated gunshot residue analysis.
- **Automated software applications** — Market-specific software solutions to extract the maximum information from Phenom desktop SEM images.
- **Optimized sample holders** — Designed to optimize sample acceptance and loading speed to guarantee the fastest time to image in the market.
- **Eucentric Sample Holder** — Makes it possible to view your sample in real time and in 3D.

Applications

Phenom-World's solutions are used as a research tool in universities or institutes, and in forensics. But they are also found in many industrial applications such as construction, automotive, pharmaceutical, additive manufacturing, batteries, non-woven, polymers and many more.

All of which means that with tools and technologies from Phenom-World, everyone is free to achieve.
