# Seed Science Research

The official journal of the International Society for Seed Science (ISSS)

## Editor-in-Chief

H.W.M. Hilhorst, Wageningen University, The Netherlands

*Seed Science Research* is an international journal publishing original and opinion papers, as well as reviews. The Journal deals primarily with the fundamentals of seed research with emphasis on the physiology, biochemistry, molecular biology and ecology of seed development, dormancy and germination.

The importance of seeds to propagation, food, biofuel and biodiversity is of increasing interest and therefore submissions on seed genetics, seed biotechnology, seed treatment and seedling establishment are especially encouraged if they are novel and 'seed driven'.
