CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1959–1960

President: E. J. H. CORNER

Vice-Presidents: J. D. BOYD, F. P. WHITE, F. P. BOWDEN

Treasurer: R. C. EVANS

Secretaries: (Mathematical) J. H. WILLIAMSON

(Physical) T. E. FABER

(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York 22, U.S.A.

For the purchase of early parts of the *Transactions*, *Proceedings* and *Biological Reviews* application should be made to the Secretaries. All parts of the *Proceedings* and *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address, and to send their subscriptions to the Treasurer, CAMBRIDGE PHILOSOPHICAL SOCIETY, FREE SCHOOL LANE, CAMBRIDGE.

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Secretaries at the Society's office.

PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

edited by

J. H. WILLIAMSON

in consultation with

P. C. CLEMMOW	F. SMITHIES	E. C. ZEEMAN
T. E. FABER	F. URSELL	
E. R. LAPWOOD	A. M. WALKER	

1. Four parts of the *Proceedings* are issued each year.

2. Communications for the *Proceedings* should be sent to *The Librarian, Cambridge Philosophical Society, Free School Lane, Cambridge*. Papers by Fellows and Associates of the Society should be communicated directly by the author. Other papers must be communicated by a Fellow, who in doing so should give his opinion on the suitability of the paper for publication.

3. Papers occupying more than twenty pages of print can only very rarely be accepted.

4. It is recommended that each paper be prefaced by a short abstract. Copies of a *Guide for the Preparation of Synopses*, prepared by the Abstracting Services Consultative Committee and issued by the Royal Society, may be obtained from the Librarian.

5. Drawings for illustration and diagrams should be on a large scale and on smooth white Bristol board in Indian ink.

6. References should be listed at the end of each paper. World List abbreviations for titles of journals should be used and first and last page numbers given where relevant.

7. **Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. A pamphlet on the preparation of papers may be obtained from the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.**

8. Authors may receive, on request, fifty offprints of a paper in the *Proceedings* without charge.

The Institution of Electrical Engineers

Advertisement Department

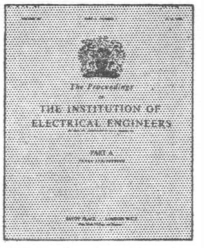
Savoy Place
London, W.C. 2
COVENT GARDEN 1871

THE JOURNAL

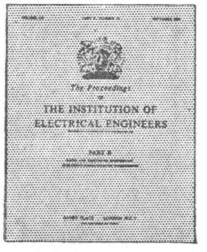
The monthly JOURNAL goes to all members of the Institution, to non-members and subscribers. It contains authoritative articles dealing with all realms of electrical engineering. It also presents a synoptic review of Institution events and serves as the main channel of communication with the professional electrical engineer. Circulation 48,263.

THE PROCEEDINGS

Part 'A'. Contains original academic papers describing new work in the heavy-current sphere of electrical engineering, covering power generation—transmission—meters—instruments; as well as reviews of progress. Published bimonthly (February, April, June, August, October and December) with a wholly subscribed circulation of 20,250.



Part 'B'. Contains original academic papers describing new work in the light-current sphere of electrical engineering, covering telecommunication—radio engineering—electronics; as well as reviews of progress. Published bimonthly (January, March, May, July, September and November) with a wholly subscribed circulation of 16,000.



FULL PARTICULARS OF SUBSCRIPTION AND ADVERTISEMENT RATES FOR THE

JOURNALS

ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in two series: SERIES A (GENERAL), four issues a year, annual subscription £4. 4*s*. (U.S. $12.00) post free; SERIES B (METHODOLOGICAL), two issues a year, annual subscription £3. 2*s*. (U.S. $9.00) post free.

Contents of Series B (Methodological), Vol. 22, Part 2, 1960

Models in the analysis of variance. By R. L. PLACKETT. (With Discussion.)

Discrete stochastic processes in population genetics. By W. F. BODMER. (With Discussion.)

A problem of delayed service. I. By A. BEN-ISRAEL and P. NAOR.

A problem of delayed service. II. By A. BEN-ISRAEL and P. NAOR.

On the transient behaviour of a simple queue. By P. D. FINCH.

Queueing at a single serving point with group arrival. By B. W. CONOLLY.

On some extensions of Bayesian inference proposed by Mr Lindley. By R. A. FISHER.

A method of estimation of missing values in multivariate data suitable for use with an electronic computer. By S. F. BUCK.

Estimation of parameters of a multivariate normal population from truncated and censored populations. By NAUNIHAL SINGH.

Necessary restrictions for distributions *a posteriori*. By D. A. SPROTT.

Weight of evidence, corroboration, explanatory power, information and the utility of experiments. By I. J. GOOD.

The logistic process: tables of the stochastic epidemic curve and applications. By EDWIN MANSFIELD and CARLTON HENSLEY.

Some notes on pistimetric inference. By A. D. ROY.

Evaluation of determinants, characteristic equations and their roots for a class of patterned matrices. By S. N. ROY, B. G. GREENBERG and A. E. SARHAN.

Bounds for the expected sample size in a sequential probability ratio test. By M. N. GHOSH.

A note on tests of homogeneity applied after sequential sampling. By D. R. COX.

The interaction algorithm and practical Fourier analysis: an addendum. By I. J. GOOD.

Approximate solutions of Green's type for univariate stochastic processes. By H. E. DANIELS.

The Wilcoxon test and non-null hypotheses. By G. B. WETHERILL.

From Dualism to Unity in Quantum Physics

A. LANDÉ

Professor Landé aims to give quantum physics a new and sound theoretical basis. He sets out to reduce the quantum phenomena to more elementary general principles, such as symmetry, invariance and continuity, and he develops the current Bohr-Heisenberg account into a unitary theory. A significant contribution to both physics and the philosophy of science. 18*s.* 6*d. net*

JOURNAL OF THE SOCIETY FOR

INDUSTRIAL AND APPLIED MATHEMATICS

1960

VOLUME 8, NUMBER 3, SEPTEMBER 1960

A Generalized Equipment Replacement Study. STUART E. DREYFUS

Matrix Equations for the Determination of Beam Natural Frequencies. WILBUR T. MCKINNEY

Algorithms for Chebyshev Approximations Using the Ratio of Linear Forms. HENRY L. LOEB

The Replacement and Expansion of Durable Equipment. FRANK W. SINDEN

The Detection of Radar Echoes in Noise. II. E. J. KELLY, I. S. REED and W. L. ROOT

On the Convergence of the Discrete Ordinate Method. BURTON WENDROFF

A Procedure for Finding a Zero of a Vector-Valued Function with Certain Monotonicity Properties. M. GERSTENHABER

The Goursat Problem. MILTON LEES

A Note on Numerical Integrating Operators. II. T. F. BRIDGLAND, Jr.

Maximally Stable Numerical Integration. HERBERT S. WILF

The Range of a Fleet of Aircraft. J. N. FRANKLIN

On Centered Difference Equations for Hyperbolic Systems. BURTON WENDROFF

The Journal is published quarterly. Subscriptions are $10.00 per volume
Single numbers $2.50 per copy from 1954, $3.00 per copy for 1953. Orders should be placed with the

Some papers which appear in this Part of the *Proceedings* have suffered delays through a variety of causes for which the authors are not responsible. The Editors very much regret this, and wish to express their apologies to the authors concerned.
