

Nutrition Research Reviews, published annually by Cambridge University Press, presents authoritative and critical reviews of research that advance new concepts and encourage fresh thinking on a variety of nutritional problems. The journal's main objective is to encourage the exchange of fundamental ideas on nutritional well-being. The subscription (excluding VAT) to volume 9, 1996, is £50 including postage (US \$90 in USA, Canada and Mexico).

The Proceedings of the Nutrition Society, published by Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The meetings also include sessions at which papers are communicated by members and others on original work. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription (excluding VAT) to the *Proceedings* is £144.00 (US \$264.00 in USA, Canada and Mexico). Single issues are £53.00 (US \$98.00 in the USA, Canada and Mexico) each; postage extra.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/96 \$11.00+.10. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information of *The British Journal of Nutrition* and all other Cambridge journals is available on <http://www.cup.cam.ac.uk/> and in North America on <http://www.cup.org/>.

CONTENTS

EditorialNew features in the *British Journal of Nutrition*. Keith N. Frayn 1**An appreciation**

Hamish Nisbet Munro. J. C. Waterlow 3-7

Human and Clinical Nutrition

Maximal voluntary contraction as a functional indicator of adult chronic undernutrition. M. Vaz, S. Thangam, A. Prabhu & P. S. Shetty 9-15

Dietary patterns and their associations with demographic, lifestyle and health variables in a random sample of British adults. Margaret J. Whichelow & A. Toby Prevost 17-30

Food photography II: use of food photographs for estimating portion size and the nutrient content of meals. M. Nelson, M. Atkinson & S. Darbyshire 31-49

Does chronic supplementation of the diet with dietary fibre extracted from pea or carrot affect colonic motility in man? Claire Guédon, Philippe Ducrotté, Jean Michel Antoine, Philippe Denis, Raymond Colin & Eric Lerebours 51-61

A new breakfast cereal containing guar gum reduces postprandial plasma glucose and insulin concentrations in normal-weight human subjects. R. M. Fairchild, P. R. Ellis, A. J. Byrne, S. D. Luzio & M. A. Mir 63-73

The gastro-ileal digestion of ¹⁵N-labelled pea nitrogen in adult humans. Nicolas Gausserès, Sylvain Mahé, Robert Benamouzig, Catherine Luengo, Henriette Drouet, Jacques Rautureau & Daniel Tomé 75-85**Animal Nutrition**

Crude protein and supplemental dietary tryptophan effects on growth and tissue neurotransmitter levels in the broiler chicken. R. W. Rosebrough 87-96

The nutritive value of stackburned yellow maize for livestock: tests *in vitro* and in broiler chicks. S. Panigrahi, L. A. Bestwick, R. H. Davis & C. D. Wood 97-108Phospholipid fatty acids of brain and liver are modified by α -tocopherol and dietary fat in growing chicks. H. Fuhrmann & H. P. Sallmann 109-122**General Nutrition**

Changes in protein distribution in normal and protein-deficient rats during an acute-phase 'injury' response. G. Jennings & M. Elia 123-132

Erythrocyte morphology and filterability in rats fed on diets containing different fats and oils. Alison J. Maccoll, Kerry A. C. James & Chris L. Booth 133-140

Influence of oat saponins on intestinal permeability *in vitro* and *in vivo* in the rat. Gunilla Onning, Quan Wang, Björn R. Weström, Nils-Georg Asp & Börje W. Karlsson 141-151**Announcements**

153-156
