

S34-03

THE RELATIONSHIP BETWEEN STREPTOCOCCAL ANTIBODIES AND THE COURSE OF OCD AND TICS IN A PEDIATRIC POPULATION

T. Murphy¹, E. Storch²

¹*Pediatrics and Psychiatry, University of South Florida,* ²*University of South Florida, Tampa, FL, USA*

The clinical phenotype of pediatric OCD and tic disorders in relation to streptococcal antibody patterns will be discussed. Also, cellular and other immune findings will be presented on a group of children with OCD and tic disorders taking into account clinical phenotype data.
