

GLASGOW MATHEMATICAL JOURNAL

Information for authors

General policy. The *Glasgow Mathematical Journal* publishes original research papers in any branch of Pure or Applied Mathematics. Its policy is to feature a wide variety of research areas and it welcomes the submission of papers from all parts of the world. Selection for publication is on the basis of reports from specialist referees commissioned by the Editors.

Preparation of papers. Papers should be typed or word-processed in double spacing with wide margins. They should be prepared so as to conform to the practice in current issues of the Journal as regards general layout, references, tables and figures. If special fonts are used, they should conform to the Journal's practice.

References should be placed at the end of the paper, arranged and numbered in alphabetical order. In the text, reference numbers should be enclosed in square brackets to distinguish them from formula numbers which should be quoted in round brackets. The following particulars should be given, in the order indicated:

for references to books—author, title, edition, publisher, year of publication;
for references to articles in periodicals—author, title of article, short title of periodical, series number (if any), volume number, year, pagination.

Text figures must be suitable for photographic reproduction and supplied separate from the text but allocated clearly to sections of the text.

Instructions regarding unusual symbols or any typographical point that might cause confusion should be provided on a separate sheet.

Authors are reminded that they should retain a copy of anything submitted for publication since neither the Journal nor its printers can accept liability for any loss.

Proofs. Prior to publication sets of proofs of each paper will be sent to authors. The Journal asks for the cooperation of authors in returning their proofs promptly and in minimising the corrections they ask for. Excessive corrections may be charged to authors.

Offprints. Authors of papers printed in the Journal are entitled to 50 offprints free of charge. Additional copies can be supplied at cost if ordered and paid for before publication. An order form will be sent with each set of proofs.

Submission of papers. Two copies of each paper should be sent to:

CONTENTS

Jan Okniński , Prime and semiprime semigroup rings of cancellative semigroups	1
C. Hooley , On ternary quadratic forms that represent zero	13
Karl Auinger , Bifree objects in e -varieties of strict orthodox semigroups and the lattice of strict orthodox $*$ -semigroup varieties	25
Mario Petrich , The congruence lattice of an ideal extension of semigroups	39
R. C. Baker and J. Brüdern , Pairs of quadratic forms modulo one	51
Patrick J. Browne and B. D. Sleeman , A note on the characterisation of eigencurves for certain two parameter eigenvalue problems in ordinary differential equations	63
Ibrahim Assem and Otto Kerner , Tilting modules and a theorem of Hoshino	69
Theodosios Zachariades , Weakly stable Banach spaces and the Banach–Saks properties	79
Hans-Olav Tylli , A spectral radius problem connected with weak compactness	85
James C. Beidleman and Howard Smith , On Frattini-like subgroups	95
S. D. Brodskii and James Howie , One-relator products of torsion-free groups	99
Thomas Kiventidis , Positive solutions of integrodifferential and difference equations with unbounded delay	105
Pedro V. Silva , Normal-convex embeddings of inverse semigroups	115
K. J. Horadam , Cohomological periodicity in graph products of combinatorially aspherical groups	123
Robert L. Snider , Invariant ideals of commutative rings	131
