## UNIVERSAL DRAFTING MACHINES.

When time presses, the Universal Drafting Machine proves its greatest worth. It is a remarkable aid to clearness of thought, accuracy and rapidity of expression. It considerably increases the efficiency of a draftsman owing to its accuracy and easy sensitive motion.

All our draftsmen use them; we could not afford to have our drawings made by the old method.

May we send YOU particulars?

# Drills for Every Purpose

There are nearly 5,000 separate drilling operations required in the building of a Tank, and it is self-evident that continuous heavy work of this character constitutes a tremendous test on the efficiency of the drills employed. Accuracy, speed and reliability are among the qualifications a tool must possess, and it is because B.S.A. High Speed Steel Twist Drills have proved unequalled from these and all points of view that they are so widely used on Tank building and other work of National importance.

### MOTOR CARS

Beautiful in Design  
Mechanically Correct  
Thoroughly Modern

Humber Limited

London : 32, Holborn Viaduct, E.C.1.

Repair Works : Canterbury Rd., Kilburn, N.W.

Southampton : 25 and 27, London Road.

Works : Coventry.

The need for economy will determine your choice. Only an Efficient Car can be economical.

The HUMBER 10 h.p. and 14 h.p. after-war models will satisfy the most exacting demand. The standard of accuracy and finish in all mechanical details eliminates friction, promoting smooth running, and ensuring the minimum expense for fuel and tyres.

These features are combined with moderate first cost and must exert their influence in favour of the HUMBER.

*Buyer of Every Description of Aluminium Scrap and Swarf.*

For many years Engineers who used leather for clutches and brakes have substituted **FERODO FRICTION SURFACES** which are vastly more efficient.

Over twenty years ago we invented Ferodo Fabrics. Since then, by specialising on the one product, and as a result of practical experience, we have so improved them that they are to-day readily acknowledged to be the finest friction surfaces in the world.

They are entirely unaffected by water, oil or acid, and absorb more foot lbs. of energy per square inch than any other material known. Wood and leather linings char and quickly wear out. Ferodo Fabrics are spark-proof and non-inflammable.

*Ferodo Fabrics have the name stamped on each foot. Look for it when ordering your new linings.*

TRADE MARK

Manufacturers of the world-famous Bowden  
Wire Mechanism and Controls.  
*Established 1897.*

WITH the advent of the long-hoped-for peace, we are able to announce our preparedness to resume the manufacture of our pre-war products.

While still engaged upon several war adaptations of BOWDEN WIRE MECHANISM, the great extension of premises, plant and machinery effected during the war makes it possible for us to deal promptly with fresh orders or all kinds of pre-war goods.

We invite enquiries.

## GOLD MILD STEEL PUNCHINGS.

THE multiplicity of special contracts entrusted to us by various Government Departments during the period of the War, has necessitated the laying down of a large number of presses for punchings of many varied descriptions, with the result that the Company now has at its command the most up-to-date plant in the Country for this class of work.

Inquiries are invited from Manufacturers of Motor, Aero and other Engineering Fitments, and quotations will be given for prompt delivery for large or small punchings in bulk quantities.

These cold punchings are infinitely superior to hot stampings. Wear and tear of machine tools reduced to a minimum.

Every time you "Go up"-  
you run a needless risk

- if your goggles, windscreen, panels, etc., are of ordinary glass. You run the risk of the glass breaking on the least shock or impact, and when ordinary glass breaks it splinters and causes injury.

By using "Triplex" Safety Glass wherever glass is needed you eliminate this risk entirely, for nothing can make "Triplex" splinter.
