

Directions to Contributors - Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of the *Proceedings* (February), or contact the Editorial Office on +44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax) or i.sambrook@nutsoc.org.uk (e-mail).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. The *Proceedings* is printed in double-column format (column width of 85 mm) with a text area of 235 x 177 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. The original illustrations should accompany the manuscript for submission. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Hollman PCH, Devries JHM, Vanleeuwen SD, Mengelers MJB & Katan MB (1995) Absorption of dietary quercetin glycosides and quercetin in healthy ileostomy volunteers. *American Journal of Clinical Nutrition* **62**, 1276-1282.

Elia M (1992) Organ and tissue contribution to metabolic rate. In *Energy Metabolism: Tissue Determinants and Cellular Corollaries*, pp. 61-77 [J Kinney and H Tucker, editors]. New York: Raven Press.

Wilmore JH & Costill DL (1994) *Physiology of Sport and Exercise*. Champaign, IL: Human Kinetics.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Two sets of page proofs will be provided to authors for checking; one set should be returned as promptly as possible to Dr I.E. Sambrook, Executive Editor, The Proceedings of the Nutrition Society, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Manuscripts. Three complete copies of the manuscript together with the original artwork should be submitted to:

Contents

University of Newcastle upon Tyne, 9–11 July 1997

Plenary lectures

- Gene–environment interactions in the pathogenesis of type 2 diabetes mellitus: lessons learned from the Pima Indians.
Richard E. Pratley 175–181
- Diet and cancer prevention: the Concerted Action Polyp Prevention (CAPP) Studies.
J. Burn, P. D. Chapman, D. T. Bishop & J. Mathers 183–186
- Genetics, calcium intake and osteoporosis.
John A. Eisman 187–193

Symposium on ‘Nutrient regulation of cell proliferation and death’

Chair: D. S. Parker, University of Newcastle upon Tyne

- Nutritional and hormonal regulation of hair follicle growth and development.
Hugh Galbraith 195–205
- Nutritional and hormonal control of skeletal-muscle cell growth and differentiation.
John M. Brameld, Peter J. Buttery, Janet M. Dawson & Jane M. M. Harper 207–217
- Nutrient regulation of intestinal proliferation and apoptosis.
J. C. Mathers 219–223

Student Symposium

Chair: R. Bennett, University of Newcastle upon Tyne

- Some aspects of the metabolic response to surgical trauma.
A. R. Bosagh Zadeh & P. W. Emery 225–229
- The role of nutrition and diet in rheumatoid arthritis.
Rosemary H. Martin 231–234
- The effect of prenatal diet and glucocorticoids on growth and systolic blood pressure in the rat.
David S. Gardner, Alan A. Jackson & Simon C. Langley-Evans 235–240
- Nutrition, immunity and the fetal and infant origins of disease hypothesis in developing countries.
Sophie E. Moore 241–247

Symposium on ‘Nutrient regulation of gene expression’

Chairs: M. J. Rennie, University of Dundee; M. Elia, Cambridge

- Molecular biological approaches to nutrient–gene interactions.
John K. Chesters 249–256
- Response of placental amino acid transport to gestational age and intrauterine growth retardation.
James C. Matthews, Mark J. Beveridge, Marc S. Malandro, Michael S. Kilberg & Donald A. Novak 257–263
- Regulation of liver gene expression by glucose.
Franck Rencurel & Jean Girard 265–275
