

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

EDITORIALS

Service users as collaborators in mental health research: less stick, more carrot
Staley K, Kabir T & Szumukler G 1121

Withdrawing interferon- α from psychiatric patients: clinical care or unjustifiable stigma?
Spennati A & Pariante CM 1127

REVIEW ARTICLE

An updated and conservative systematic review and meta-analysis of epidemiological evidence on psychotic experiences in children and adults: on the pathway from proneness to persistence to dimensional expression across mental disorders
Linscott RJ & van Os J 1133

ORIGINAL ARTICLES

A 20-year multi-follow-up of hallucinations in schizophrenia, other psychotic, and mood disorders
Goghari VM, Harrow M, Grossman LS & Rosen C 1151

Cognitive remediation improves memory and psychosocial functioning in first-episode psychiatric out-patients
Lee RSC, Redoblado-Hodge MA, Naismith SL, Hermens DF, Porter MA & Hickie IB 1161

Spatial distribution and cognitive correlates of gamma noise power in schizophrenia
Díez Á, Suazo V, Casado P, Martín-Loeches M & Molina V 1175

Persistence of cognitive impairment and its negative impact on psychosocial functioning in lithium-treated, euthymic bipolar patients: a 6-year follow-up study
Mora E, Portella MJ, Forcada I, Vieta E & Mur M 1187

Neuroticism, depressive symptoms and white-matter integrity in the Lothian Birth Cohort 1936
McIntosh AM, Bastin ME, Luciano M, Muñoz Maniega S, del C. Valdés Hernández M, Royle NA, Hall J, Murray C, Lawrie SM, Starr JM, Wardlaw JM & Deary IJ 1197

Variants within the GABA transaminase (ABAT) gene region are associated with somatosensory evoked EEG potentials in families at high risk for affective disorders
Wegerer M, Adena S, Pfennig A, Czamara D, Sailer U, Bettecken T, Müller-Myhsok B, Modell S & Ising M 1207

Prefrontal cortex function in remitted major depressive disorder
Nixon NL, Liddle PF, Worwood G, Liotti M & Nixon E 1219

High-risk occupations for suicide
Roberts SE, Jaremin B & Lloyd K 1231

The role of negative emotionality and impulsivity in depressive/anxiety disorders and alcohol dependence
Boschloo L, Vogelzangs N, van den Brink W, Smit JH, Beekman ATF & Penninx BWJH 1241

Cannabis affects people differently: inter-subject variation in the psychotogenic effects of Δ^9 -tetrahydrocannabinol: a functional magnetic resonance imaging study with healthy volunteers
Atakan Z, Bhattacharyya S, Allen P, Martín-Santos R, Crippa JA, Borgwardt SJ, Fusar-Poli P, Seal M, Sallis H, Stahl D, Zuardi AW, Rubia K & McGuire P 1255

Delinquent peer affiliation as an etiological moderator of childhood delinquency
Burt SA & Klump KL 1269

Prenatal adversity: a risk factor in borderline personality disorder?
Schwarze CE, Mobascher A, Pallasch B, Hoppe G, Kurz M, Hellhammer DH & Lieb K 1279

Early motor developmental milestones and level of neuroticism in young adulthood: a 23-year follow-up study of the Copenhagen Perinatal Cohort
Flensburg-Madsen T, Sørensen HJ, Revsbech R & Mortensen EL 1293

The relationship between happiness and intelligent quotient: the contribution of socio-economic and clinical factors
Ali A, Ambler G, Strydom A, Rai D, Cooper C, McManus S, Weich S, Meltzer H, Dein S & Hassiotis A 1303

Severity and persistence of asthma and mental health: a birth cohort study
Goodwin RD, Robinson M, Sly PD, McKeague IW, Susser ES, Zubrick SR, Stanley FJ & Mattes E 1313

Genetic analysis of reaction time variability: room for improvement?
Kuntsi J, Frazier-Wood AC, Banaschewski T, Gill M, Miranda A, Oades RD, Roeyers H, Rothenberger A, Steinhausen H-C, van der Meere JJ, Faraone SV, Asherson P & Rijdsdijk F 1323

Predictive significance of the overvaluation of shape/weight in obese patients with binge eating disorder: findings from a randomized controlled trial with 12-month follow-up
Grilo CM, White MA, Gueorguieva R, Wilson GT & Masheb RM 1335
