Liberal Leviathan

The Origins, Crisis, and Transformation of the American World Order

G. John Ikenberry

Theories of International Politics and Zombies

Daniel W. Drezner

“Bless Dan Drezner for this book which punches huge holes in the hokum of American foreign policy thinking. Our theories in this business have been thin and often very costly, and if it takes Drezner’s ‘zombie attack’ to puncture their bloat, so be it. Besides, the book is fun.”

“This handbook is a monumental undertaking. It contains something of value for political scientists of every methodological and substantive stripe.”

– Morris P. Fiorina, Stanford University

Laboratory experiments, survey experiments, and field experiments occupy a central and growing place in the discipline of political science. The *Cambridge Handbook of Experimental Political Science* is the first text to provide a comprehensive overview of how experimental research is transforming the field. Some chapters explain and define core concepts in experimental design and analysis. Other chapters provide an intellectual history of the experimental movement. Throughout the book, leading scholars review groundbreaking research and explain, in personal terms, the growing influence of experimental political science. This handbook provides a collection of insights that can be found nowhere else. Its topics are of interest not just to researchers who are conducting experiments today, but also to researchers who think that experiments can help them make new and important discoveries in political science and beyond.

GREAT SOUL

Mahatma Gandhi and His Struggle with India
by Joseph Lelyveld

Pulitzer Prize–winner Joseph Lelyveld’s highly original, stirring book is a vital, brilliant reconsideration of Gandhi’s extraordinary struggles for social transformation and justice. Lelyveld deepens our sense of Gandhi’s achievements and disappointments and a clear picture emerges of his fierce but, finally, unfulfilled hopes, and of his ever-evolving legacy, which more than six decades after his death still ensures his place as India’s social conscience.

“[A] meditation on the interlinked puzzles of Mohandas ‘Mahatma’ Gandhi’s strange personal disciplines, the communalistic passions of the two societies where Gandhi worked (South Africa and India), his improbable achievements against vast odds, and the ultimate failure of his ideals.”

THE RIGHTS OF THE PEOPLE

How Our Search for Safety Invades Our Liberties
by David K. Shipler

An impassioned, incisive look at the violations of civil liberties in the United States that have accelerated over the past decade—and their direct impact on our lives.

“[David] Shipler shows us, through carefully drawn and often moving accounts of real-life encounters between individuals and the state, the true cost of sacrificing liberty for security.” —David Cole, author of *No Equal Justice*

“David Shipler has . . . [taken] the guarantees in our Constitution and explored, on the ground, how they were actually being applied in the lives of Americans. The result is a wonderful book that shows how large a gap there is between constitutional promises and reality.” —Anthony Lewis, author of *Gideon’s Trumpet*

By reading thousands of pages of government documents and conducting over 100 interviews with clients, competitors, regulators, current and former Goldman employees (as well as the six living men who have run Goldman), William Cohan has constructed a vivid narrative that looks behind the veil of secrecy to reveal how Goldman has become so profitable, and so powerful.

TROUBLEMAKER

A Memoir From the Front Lines of the Sixties
by Bill Zimmerman

In his extraordinary memoir, Bill Zimmerman takes us into the hearts and minds of those who made the social revolution of the sixties. Frequently putting his life at risk for the greater social good, Zimmerman recounts his experiences on the front lines of the social revolution: registering black voters in deep in Mississippi; marching with Martin Luther King Jr. in Chicago; fighting the police at the 1968 Democratic convention; smuggling medicines to the front lines in North Vietnam. Zimmerman—who crossed paths with political organizers and activists like Abbie Hoffman, Daniel Ellsberg, César Chávez, Jane Fonda, and Tom Hayden—captures a groundbreaking zeitgeist that irrevocably changed the world as we knew it.

AGE OF GREED

The Triumph of Finance and the Decline of America, 1970 to the Present
by Jeff Madrick

A vividly told history of greed and its greatest practitioners in the last forty years, and how it gave rise to our current economic ills. As Jeff Madrick makes clear in a sweeping narrative the single-minded pursuit of huge personal wealth did not start in the 2000s but has been on the rise in the United States since the 1970s, led by a few individuals who argued that self-interest guides society more effectively than community concerns. In telling the stories of the politicians, economists, and financiers—who declared a moral battle for freedom but gave rise to an age of greed—Madrick traces the lineage of some of our nation’s most pressing economic problems.

MAÑANA FOREVER?

Mexico and the Mexicans
by Jorge G. Castañeda

In this shrewd and fascinating book, the renowned scholar and former foreign minister Jorge Castañeda sheds much light on the puzzling paradoxes of his native country. Castañeda examines the future possibilities for Mexico as it becomes more diverse in its regional identities, socially more homogenous, its character and culture the instruments of change rather than sources of stagnation, its political system more open and democratic. *Mañana Forever?* is a compelling portrait of a nation at a crossroads.

Why Marx Was Right

Terry Eagleton

Taking ten of the most common objections to Marxism—that it leads to political tyranny, that it reduces everything to the economic, that it is a form of historical determinism, and so on—Eagleton demonstrates what a travesty of Marx's own thought these assumptions are. Written with Eagleton's familiar wit, humor, and clarity, *Why Marx Was Right* is as urgent and timely as it is brave and candid.

A Quiet Revolution

*The Veil's Resurgence, from the
Middle East to America*
Leila Ahmed

This probing study of the veil's recent return—from one of the world's foremost authorities on Muslim women—reaches surprising conclusions about contemporary Islam's place in the West today. "A powerful and critically important analysis of the veil's modern history and reemergence in our time . . . It is compelling reading for the many readers with questions about the veil and its meanings." —Diana Eck

NEW BOOK FROM THE **CAIO**
INSTITUTE

“It has long been observed that global warming offers opportunities for a huge number of interests to exploit and that the eagerness to exploit the issue has led to a remarkable corruption of institutions—public, private, and academic. In a set of cogent and well-written contributions, *Climate Coup* documents what is happening intelligently and in depth.”

—RICHARD S. LINDZEN
Massachusetts Institute of Technology

Despite convincing evidence that observed climate changes do not portend a calamitous future, global warming alarmism is invading nearly every aspect of our society. Leading climatologist Patrick Michaels and his team of first-rate experts show the pervasive influence global warming alarmism has on our lives—from national defense, law, trade, and politics to health, education, and international development.
