PUBLISHED BY
DEPARTMENT OF MATHEMATICS, FACULTY OF SCIENCE
NAGOYA UNIVERSITY

Nagoya Mathematical Journal is, in principle, the official organ of the Department of Mathematics, Nagoya University, designed solely for the publication of research papers. However, some invited papers and other original papers in mathematics from all over the world are also regularly published in Nagoya Mathematical Journal. Currently, 4 volumes are published each year.

All manuscripts should be typewritten in English, French, or German with sufficient space between lines, and special letters such as bold-face, German, Greek, and script should be clearly marked. All single letters used in formulas will appear in italic, and mathematical symbols will appear in the standard style usual for mathematical literature. Therefore, it is not required to mark such letters and symbols. Instructions which conflict with the general printing rules of the journal will not be accepted. For example, each paragraph title should appear in bold-face. Good reproductions of a typewritten manuscript are acceptable.

As soon as we receive a manuscript, a receipt will be sent to the author. When a manuscript has been sent to a referee, the author will receive another notice. These receipts and notices, however, do not mean anything regarding the acceptability of the paper for publication. If the editorial committee has decided to accept a paper, the author will receive a notice containing the number of the volume in which the paper will appear.

Each author, as well as each co-author, will have 100 reprints, while only one set of proof will be prepared per paper for proof-reading by the author(s). Therefore, a joint paper must carry instructions as to whom the proof should be sent.

The actual business of the Nagoya Mathematical Journal is performed by the managing editor with the cooperation of editors residing in Nagoya.

The manuscript and general correspondence should be addressed to: Managing editor, Nagoya Mathematical Journal, Department of Mathematics, Faculty of Science, Nagoya University, Chikusa-ku, Nagoya, 464, Japan.

CONTENTS

Abe, Y.: (H, C) -groups with positive line bundles	1
Brooks, R. and Tse, R.: Isospectral surfaces of small genus	13
Kitaoka, Y.: Modular forms of degree n and representation by quadratic forms IV	25
Miyata, Y.: Vertices of ideals of a p -adic number field II	49
Kempf, G.: A decomposition formula for representations	63
Nagase, H.: On an estimate for solutions of nonlinear elliptic variational inequalities	69
Hibi, T.: Union and glueing of a family of Cohen-Macaulay partially ordered sets	91
Ono, T.: On some class number relations for Galois extensions	121
Odai, Y.: On unramified cyclic extensions of degree l of algebraic number fields of degree l	135
Vitulli, M. A.: Corrections to “Seminormal rings and weakly normal varieties”	147
