

THE AERONAUTICAL QUARTERLY

Volume I

MAY 1949

Part I

CONTENTS

Foreword

Control Reversal Effects on Swept-Back
Wings

H. Templeton

Calculation of Downwash behind a Super-
sonic wing

G. N. Ward

Estimation of the Effect of a Parameter
Change on the Roots of Stability
Equations

K. Mitchell

Flutter of Systems with Many Freedoms

W. J. Duncan

Note on Propeller-Turbine Reduction
Methods

E. C. Pike

Determination of the Drag of Jet-Propelled
Aircraft in Flight

G. W. Trevelyan
and *D. R. Blundell*

Notes on the Linear Theory of Incom-
pressible Flow round Symmetrical
Swept-Back Wings at Zero Lift

F. Ursell
