AKINETON[®]

**works well
in any
Parkinsonism
syndrome,
regardless of
etiology.
Organic or
drug-induced.**

- effective at low daily doses
- reduces rigidity and tremors
- infrequent adverse reactions
- versatile – available in 2mg. tablets and injectable
- can be used concomitantly with other anti-parkinson drugs

I find writing hard

When Parkinson symptoms begin to disable start

AKINETON[®] (b i p e r i d e n)

In early Parkinsonism, tremor and rigidity of the upper extremities are emotionally debilitating as capacity to write or for self-care are reduced. Start AKINETON early to minimize or relieve symptoms, improve function.

WARNINGS, PRECAUTIONS, ADVERSE REACTIONS: Isolated instances of mental confusion, euphoria, agitation and disturbed behavior have been reported in susceptible patients. Use with caution in manifest glaucoma, prostatism and cardiac arrhythmia. Dry mouth, blurred vision and drowsiness appear infrequently. If gastric irritation occurs, it may be avoided by administering during or after meals. With parenteral administration, mild transient postural hypotension may be evidenced. The only known contraindication is sensitivity to Akineton (biperiden.) **SUPPLIED:** Tablets—2 mg. (bisected) Akineton HCl.

Making Good Medicine Better

The time has come for

Codman introduces ACCU-FLO* Shunt Systems,

the result of a searching examination of available products, the advice of leading neurosurgeons, and our 135 years of experience in meeting surgical needs. We feel we can now make a fresh contribution to the management of hydrocephalus by offering a line of products integrated by their reliability.

Cardiac and Peritoneal Catheters

The slits in our distal valve catheters are precisely cut by special equipment of our own design for more consistent opening and closing pressures. Available in low, medium, or high pressures, with radiopaque markers, barium impregnated, anti-kink imbedded spring, or open ended.

Reservoirs

The bases of our reservoirs are designed to prevent a needle from passing through during medication. Available as double-dome flat bottom, single-dome flat bottom, or 14mm burr hole.

Ventricular Catheters

Multiple small holes near the closed tips strain the C.S.F. to resist clogging. Available with radiopaque markers, barium impregnated, flanged barium impregnated, anti-kink imbedded spring, or right angle bend.

*Trademark

ACCU-FLO Proximal Valve manufactured by Bio-Medical Research, Ltd.

better shunt systems

The ACCU-FLO Proximal Valve

Our design incorporates two valves in one for increased reliability and double protection against refluxing. In addition, every ACCU-FLO Proximal Valve is delivered with *its own test report* showing a strip-chart record of opening pressure, closing pressure, and flow rates. Available in low, medium, or high pressure.

“ACCU-FLO” means just what it says: Accurate flow. Since the treatment of hydrocephalus depends above all on the sure flow of C.S.F., we have made ACCU-FLO Shunt components as reliable as we know how. Ask us to send you our catalog of ACCU-FLO products and get a fresh look at dependability. Codman & Shurtleff, Division of Ethicon Sutures Ltd., Peterborough, Ontario K9J 7B9

THE EDITORIAL BOARD wish to publish original work in the basic and clinical neurosciences on the understanding that it has not been and will not be published elsewhere. Review articles on timely subjects will be accepted. Manuscripts should be typed double spaced, on white paper. Each manuscript must include a summary of 100 to 150 words.

Papers will be accepted in French or English. All papers should be accompanied by a short résumé in the other language. The résumé translation will be done by the editorial board if requested.

Papers should be identified only by the full name of the author, or authors, and the name of the place in which the work was done.

ILLUSTRATIONS: Photographs should be unmounted on glossy paper and show magnification scale. They should be marked on the back with figure number, title of paper and name of author.

Diagrams should be in India ink and large enough to be informative after reduction.

All illustrations should be referred to as figures, numbered consecutively, not included in the body of the text and all captions should be typed on a separate piece of paper.

Colored illustrations cannot usually be accepted unless the author is prepared to assist with the cost of reproduction.

REFERENCES: These should follow the Harvard system. Quote the name of the author followed by the date in brackets. i.e. Isacson, (1967). References should be typed in alphabetical order on a separate sheet and include authors name, initials, year, title in full, publication in full, volume, first and last page. i.e. Isacson, P. (1967). Myxoviruses and autoimmunity. *Progress in Allergy*, 10, 256-292.

Textbook references should include name of text, authors name, page number, publisher and city.

REPRINTS: Fifty reprints will be supplied free if ordered when the galley proofs are returned. More may be ordered at a nominal charge. Corrections and changes in the galley proofs,

apart from printer's errors may be charged to the author.

SUBSCRIPTIONS: This journal is issued four times a year. The annual rate is \$20.00 (Canadian); Internes, Residents, Pre- and Post-Doctoral Students, \$10.00 per annum.

ADVERTISING: Enquiries regarding advertising space and rates should be directed to LEX LTD. VANCO PUBLICATIONS, 2 Tremont Crescent, Don Mills, Ontario M3B 2S1.

All communications, manuscripts, subscriptions, etc. should be sent to the Editor at 1516 - 233 Kennedy St., Winnipeg, R3C 3J5, Canada.
