# Corrigendum

Nonrepresentative Representatives: An Experimental Study of the Decision Making of Elected Politicians - CORRIGENDUM

LIOR SHEFFER   *University of Toronto*
PETER JOHN LOEWEN   *University of Toronto*
STUART SOROKA   *University of Michigan*
STEFAAN WALGRAVE   *University of Antwerp*
TAMIR SHEAFER   *Hebrew University*

The above paper was published with an incorrect image displayed for figure 5. The correct figure 5 is shown below.

FIGURE 5.   Proportion of politicians and citizens voting to extend a small loan program in the sunk cost experiment, by experimental treatment.

Notes: Left panel displays results by size of sunk cost. Low sunk cost—investment is short $50 million. High sunk cost—$200 million. Right panel displays results by low or high accountability condition. Circles denote politicians; diamonds, citizens. Values are predicted probabilities, obtained using Clarify. Bars are 95% confidence intervals. Citizens $N = 4415$, politicians $N = 382$.

The authors apologize for this error.
