

# THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for "the promotion and extension of Mathematical Science, Pure and Applied".

Members may subscribe to the *Proceedings* at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society's address is

The Edinburgh Mathematical Society  
James Clerk Maxwell Building  
The King's Buildings  
Edinburgh EH9 3JZ

## Submission of papers

Papers to be considered for publication should be sent to the Secretary or to an Editor. Manuscripts (2 copies) should be typewritten on A4 paper with double spacing and generous margins. The style and arrangement should conform to current practice in the *Proceedings*. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society's 1990 Mathematics Subject Classification Scheme. References, including titles of papers, should be given in the form adopted by *Mathematical Reviews*, footnotes being avoided if possible. Figures should be separated from the text and lettered, ready for photographic reduction; their intended location should be clearly indicated. Manuscripts which are not suitable for submission to the printer will not be accepted. Authors are advised to retain a copy of any material submitted as the Society cannot accept responsibility for any loss.

A proof is supplied once. Authors are particularly requested to correct and return the proof promptly. Excessive corrections may be charged to authors. Fifty free offprints, and additional copies at cost, will be supplied if ordered on a form returned with the proof.

## Addresses of editors

K. A. Brown  
Department of Mathematics  
University of Glasgow  
University Gardens  
Glasgow G12 8QW

C. M. Campbell  
Mathematical Institute  
University of St Andrews  
North Haugh  
St Andrews KY16 9SS

S. D. Cohen  
Department of Mathematics  
University of Glasgow  
University Gardens  
Glasgow G12 8QW

T. N. T. Goodman  
Department of Mathematics and  
Computer Science  
University of Dundee  
Dundee DD1 4HN

A. A. Lacey  
Department of Mathematics  
Heriot-Watt University  
Riccarton  
Edinburgh EH14 4AS

C. MacLachlan  
Department of Mathematical Sciences

<b>A further necessary and sufficient condition for strong convergence of nonlinear contraction semigroups and of iterative methods for accretive operators in Banach spaces</b>	1
<i>Zong-Ben Xu, Yao-Lin Jiang and G. F. Roach</i>	
<b>Oscillation results on <math>y'' + Ay = 0</math> in the complex domain with transcendental entire coefficients which have extremal deficiencies</b>	13
<i>Y. M. Chiang</i>	
<b>Asymptotic tracts of harmonic functions II</b>	35
<i>K. F. Barth and D. A. Brannan</i>	
<b>On <math>(n, k, l, \Delta)</math>-systems</b>	53
<i>Stephen D. Cohen and Nikolai N. Kuzjurin</i>	
<b>Irreducible locally nilpotent finitary skew linear groups</b>	63
<i>B. A. F. Wehrfritz</i>	
<b>Fronts, domain walls and pulses in a generalized Ginzburg–Landau equation</b>	77
<i>Jinqiao Duan and Philip Holmes</i>	
<b>Asymptotic distribution of the zeros of certain Lagrange interpolants</b>	99
<i>M. A. Bokhari and M. Iqbal</i>	
<b>Idempotent endomorphisms of an independence algebra of finite rank</b>	107
<i>Gracinda M. S. Gomes and John M. Howie</i>	
<b>The <math>f</math>-decomposition of Artinian modules over hyperfinite groups</b>	117
<i>Z. Y. Duan</i>	
<b>The co-localization of an Artinian module</b>	121
<i>Leif Melkersson and Peter Schenzel</i>	
<b>The number of permutation polynomials of the form <math>f(x) + cx</math> over a finite field</b>	133
<i>Daqing Wan, Gary L. Mullen and Peter Jau-Shyong Shiue</i>	
<b>Functional calculi and decomposability of unbounded multiplier operators in <math>L^p(\mathbb{R}^N)</math></b>	151
<i>Ernst Albrecht and Werner J. Ricker</i>	
<b>An estimate of sectional curvatures of hypersurfaces with positive Ricci curvatures</b>	167
<i>Ju Seon Kim and Sang Og Kim</i>	
<b>A simple construction of exponential bases in <math>L^2</math> of the union of several intervals</b>	171
<i>Kristian Seip</i>	
<b>Open surfaces with congruent geodesics</b>	179
<i>Charlambos Charitos</i>	
<b>Projective resolutions for graph products</b>	185
<i>Daniel E. Cohen</i>	
<b>Book Reviews</b>	189
