Symposia of the British Society for Parasitology Volume 21

Parasite evasion of the immune response

Edited by R. M. E. Parkhouse

SUBSCRIPTIONS may be sent to any bookseller or subscription agent or direct to Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU. Subscriptions in the USA and Canada should be sent to Cambridge University Press, 32 East 57th Street, New York, NY 10022. All orders must be accompanied by payment. The subscription price of volume 88, 1984, is £54.00 net (including postage) for a volume of four parts (US \$136.00 in the USA and Canada) and for volume 89, 1984, £41.00 net (including postage) for a volume of three parts (US \$104.00 in the USA and Canada) payable in advance (£95.00 or US \$240.00 per year), separate parts cost £15.00 net or US \$38.00 each (plus postage). *Second class postage paid at New York, NY and at additional mailing offices.* POSTMASTER: send address changes in USA and Canada to Cambridge University Press, 32 East 57th Street, New York, NY 10022. ISSN 0031-1820.

CONTENTS

<i>Preface</i>	571
<i>List of contributions</i>	572
<i>Chairman's opening remarks</i>	573
An appraisal of survival strategies	575
Introduction	575
Regulatory mechanisms	575
(1) Clonable regulatory factors	575
(2) Suppressor and helper epitopes	576
(3) Quantitation of activity in the helper and suppressor compartments	576
References	577
Mechanisms of survival of protozoan parasites in mononuclear phagocytes	579
Summary	579
Introduction	579
Microbicidal activities of macrophages	580
(1) Morphological observations	580
(2) Biochemical events	581
(3) Microbicidal mechanisms	582
Intracellular parasite survival	582
(1) Resistance to lysosomal toxicity	583
(a) Inhibition of phagosome–lysosome fusion	583
(b) Resistance to lysosomal enzymes	584
(c) Escape from the phagolysosomes	586
(2) Parasite defences against intracellular killing: metabolic aspects	586
(a) Phagocytosis without oxidative burst	586
(b) Neutralization of oxygen metabolites	587
The fate of intracellular microorganisms as determined by the balance between cidal and defence factors	588
References	589
Sequestration – beneficial to both host and parasite	593
Tissue location	593
Granuloma formation	593
Intracellular location	594
Mechanisms intrinsic to the parasites	594
General	594
Disguise as an evasive stratagem of parasitic organisms	597
Introduction	597
Synthesized shared determinants	597

Acquired host determinants	598
(1) Blood group antigens	598
(2) Histocompatibility antigens	600
(3) Intercellular substance antigens	601
(4) Immunoglobulins	602
(5) Albumin	604
Functional studies	604
References	607
Antigenic variation in parasites	613
Introduction	613
Antigenic variation in <i>Trypanosoma</i>	614
Antigenic variation in malaria	616
Antigenic variation in <i>Babesia</i>	618
Conclusions	618
References	619
Stage-specific antigens of <i>Trichinella spiralis</i>	623
Summary	623
Introduction	623
Materials and methods	624
Parasites	624
Surface and biosynthetic labelling of parasites	624
Co-precipitation of radio-isotope labelled antigens	624
Polyacrylamide gel electrophoresis	625
Two-dimensional gel electrophoresis and radioactive concanavalin A overlay	625
Preparation of mouse monoclonal antibodies	625
Results and discussion	625
Surface antigens	625
Secreted and somatic antigens	628
References	629
Do the variable surface glycoproteins of parasites have a function?	631
Interference in general immune function by parasite infections; African trypanosomiasis as a model system	633
Summary	633
Introduction	633
The model system	634
Conclusions	636
References	637
Evasion of the immune response: survival within low responder individuals of the host population	639
Summary	639
Introduction	639
Differential parasite survival in host populations	640

Mechanisms underlying control and expression of differences in host resistance	643
<i>Leishmania</i> infections in mice	643
<i>Trichinella spiralis</i> in mice	646
Modification of low responsiveness	650
<i>Leishmania</i>	652
<i>Trichinella</i>	652
<i>Taenia taeniaeformis</i>	653
Gastro-intestinal nematodes	654
References	655
Variation in ‘target’ antigens between appropriate and inappropriate hosts of <i>Taenia saginata</i> metacestodes	659
Summary	659
Introduction	659
Materials and methods	660
<i>T. saginata</i> oncospheres	660
Immunization	660
Normal bovine serum	660
Western blotting	660
Results	660
Discussion and conclusions	662
References	663
Manipulation of the immune response in parasitic infections	665
Introduction	665
Immunosuppression	665
Immunopotentialiation	666
T-cell depletion and reconstitution	667
Neonatal thymectomy (NTx)	667
Adult thymectomy (ATx)	667
Nude mice	668
B-cell depletion	669
Splenectomy	669
Bursectomy	669
μ Suppression	669
Chimerism	670
Prophylactic immunization	671
Route of immunization	671
Passive transfer	671
Adoptive transfer	672
References	672
Use of immunological manipulations in studying genetically controlled responses to <i>Leishmania donovani</i> infection in mice	677
Parasites as immunologists	681
