Timothy E. Anna

# The Mexican Empire of **ITURBIDE**

In *The Mexican Empire of Iturbide* Timothy E.

Anna calls for a judicious assessment of Augustin de Iturbide. Anna argues that the antimonarchical bias handed down by contemporary critics and political enemies has led to a thorough misunderstanding of the 18 months during which Iturbide governed the nation he had created, the Mexican empire. That period, one of the most fascinating in Mexico's history, is the focus of this book,

which looks at the problems facing the newly independent country and the reasons for Iturbide's failure to retain broad national support. In drawing upon original eyewitness accounts Anna provides an independent perspective of the Iturbide interlude while exposing the errors and oversights of existing historiography. His conclusions, while surprising, are entirely consistent with some of the latest findings in Mexican history. \$39.50

**Essays on the Price History  
of Eighteenth-Century  
Latin America**

Edited by Lyman L. Johnson

Fluctuations in price levels indicate changes in economic performance and market conditions. Price history measures changes in living conditions and alterations in the relative strength of competing economic sectors and social classes. It also records the process of regional and international market integration. In this book the contributors explore a range of economic, social, and political issues in addition to providing indexes of prices.

## New World Soundings

Culture and Ideology in the Americas

**Richard M. Morse**

Eminent and iconoclastic cultural historian Richard Morse takes a series of sharply focused looks at the Americas. He uses political ideology to contrast the traditions of Anglo and Latin America while surveying contemporary pressures for ideological change. He inquires into the ways in which speech and poetry evoke the common historical experience of North and South America and examines the transatlantic "sea changes" of European languages. And in the book's final sections, he addresses the north-south transaction from yet three more angles, ruminating on the problems involved in conveying the Latin American experience to U.S. students, considering the impediments to U.S.-Puerto Rican understanding, and recounting the mythic adventures of McLuhanaíma, "the world's first Brazilianist," as he travels through the exotic land he has chosen for definitive research.

## The Cuban Economy

Measurement and Analysis of  
Socialist Performance

**Andrew Zimbalist and Claes Brundenius**

Until now, information on Cuban economic performance has come largely from studies by emigrant Cuban economists living in the United States. Most of these studies are predictably negative. Andrew Zimbalist and Claes Brundenius contend that they are also wrong. Based in part on extensive interviews with Cuban workers and officials, *The Cuban Economy* is the first comprehensive account of Cuban economic development to appear in the United States in the thirty years since the Castro revolution. Zimbalist and Brundenius conclude that although Cuban economic performance falls short of government claims, Cuba is still outperforming its Latin American neighbors. The lessons learned about the role of the state in economic development, they argue, have important implications for other third world countries.

# A Tale of Two Policies:

## U.S. Relations with the Argentine Junta, 1976-83

by Mark Falcoff

*A Tale of Two Policies* is a case study of one of the oldest policy dilemmas for the United States in the Third World — how to fashion policy towards non-democratic regimes that is both effective and morally satisfying. In the Argentine case, Mark Falcoff surprisingly concludes that, different as were the approaches of the Carter and Reagan people towards this problem, both administrations pursued policies irrelevant to the developments in that country. The analysis, grounded in a mastery of the political cultures of Argentina and two U.S. administrations, is a product of FPRI's three-year project on Friendly Tyrants, a comparative study of U.S. relations with pro-American regimes in the postwar era.

Mr. Falcoff is Resident Scholar in Foreign Policy at the American Enterprise Institute for Public Policy Research, Washington, D.C., and author of *Modern Chile, 1970-1989* (Transaction).

# THE MODERNIST CITY

AN ANTHROPOLOGICAL CRITIQUE OF BRASÍLIA

James Holston

The utopian design and organization of Brasília—the modernist new capital of Brazil—were meant to transform Brazilian society. In this sophisticated, pioneering study of Brasília from its inception in 1957 to the present, James Holston analyzes the attempt to change society by building a new kind of city and the

paradoxes that subverted the project. Integrating anthropology with methods of analysis from architecture, urban studies, social history, and critical theory, Holston breaks new ground in the anthropology of urban society, developing a critique of modernism through a powerfully innovative ethnographic analysis.
