

Nutrition Research Reviews, published annually by Cambridge University Press, presents authoritative and critical reviews of research that advance new concepts and encourage fresh thinking on a variety of nutritional problems. The journal's main objective is to encourage the exchange of fundamental ideas on nutritional well-being. The subscription (excluding VAT) to volume 9, 1996, is £50 including postage (US \$90 in USA, Canada and Mexico).

The Proceedings of the Nutrition Society, published by Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The meetings also include sessions at which papers are communicated by members and others on original work. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription (excluding VAT) to the *Proceedings* is £144.00 (US \$264.00 in USA, Canada and Mexico). Single issues are £53.00 (US \$98.00 in the USA, Canada and Mexico) each; postage extra.

Copying. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$11.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/96 \$11.00+.10. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information of *The British Journal of Nutrition* and all other Cambridge journals is available on <http://www.cup.cam.ac.uk/> and in North America on <http://www.cup.org/>.

VOL. 76 NO. 5 NOVEMBER 1996

The
British Journal
of Nutrition

CONTENTS

Human and Clinical Nutrition

- Body composition in female anorexia nervosa patients. *M. Probst, M. Goris, W. Vandereycken & H. Van Coppenolle* 639-647
- Influence of feeding artificial-formula milks containing docosahexaenoic and arachidonic acids on the postnatal long-chain polyunsaturated fatty acid status of healthy preterm infants. *Magritha M. H. P. Foreman-van Drongelen, Adriana C. van Houwelingen, Arnold D. M. Kester, Carlos E. Blanco, Tom H. M. Hasaart & Gerard Hornstra* 649-667
- The acute impact of ethanol on glucose, insulin, triacylglycerol, and free fatty acid responses and insulin sensitivity in type 2 diabetes. *Christian Christiansen, Claus Thomsen, Ole Rasmussen, Carsten Hansen & Kjeld Hermansen* 669-675
- Improved zinc and iron absorption from breakfast meals containing malted oats with reduced phytate content. *Marie Larsson, Lena Rossander-Hulthén, Brittmari Sandström & Ann-Sofie Sandberg* 677-688

Animal Nutrition

- Microbial amino acid synthesis and utilization in rats: incorporation of ^{15}N from $^{15}\text{NH}_4\text{Cl}$ into lysine in the tissues of germ-free and conventional rats. *David Torrallardona, C. Ian Harris, Marie E. Coates & Malcolm F. Fuller* 689-700
- Microbial amino acid synthesis and utilization in rats: the role of coprophagy. *David Torrallardona, C. Ian Harris & Malcolm F. Fuller* 701-709
- Effects of feeding and short-term fasting on water and electrolyte turnover in female mink (*Mustela vison*). *Søren Wamberg, Anne-Helene Tauson & Jan Elnif* 711-725

General Nutrition

- In vitro* availability of iron and zinc: effects of the type, concentration and fractions of digestion products of the protein. *Francisca Pérez-Llamas, Mechteldis G. E. Diepenmaat-Wolters & Salvador Zamora* 727-741
- The effects of excessive amounts of protein on lysine utilization in growing pigs. *Stefan Langer & Malcolm F. Fuller* 743-754
- Boiled coffee fails to raise serum cholesterol in hamsters and rats. *Anton C. Beynen, Marianne P. M. E. Weusten-Van der Wouw, Baukje de Roos & Martijn B. Katan* 755-764
- Lithogenic diet and gallstone formation in mice: integrated response of activities of regulatory enzymes in hepatic cholesterol metabolism. *Eva Reihner & Dagny Ståhlberg* 765-772
- Increases in calcium absorption with ingestion of soluble dietary fibre, guar-gum hydrolysate, depend on the caecum in partially nephrectomized and normal rats. *Hiroshi Hara, Masashi Nagata, Atsutane Ohta & Takanori Kasai* 773-784
