

The following papers have been accepted for publication and will appear shortly:

- DIANANDA, P. H. Some probability limit theorems with statistical applications.
- OLLERENSHAW, K. An irreducible non-convex region.
- GÜRSEY, F. Gravitation and cosmic expansion in conformal space-time.
- SOWERBY, L. The couple on a rotating spheroid in a slow stream.
- STEWARTSON, K. On the flow between two rotating coaxial discs.
- LEDERMANN, W. and REUTER, G. E. H. On the differential equations for the transition probabilities of Markov processes with enumerably many states.
- DARWIN, C. Note on hydrodynamics.
- MORGAN, G. W. Remarks on the problem of slow motions in a rotating fluid.
- EDMONDS, S. M. The Parseval formulae for monotonic functions, IV.
- CAPILDEO, R. Flexure with shear centres: a general treatment with complex variable.
- BARNES, E. S. Note on non-homogeneous linear forms.
- SILBERSTEIN, J. P. O. On eigenvalues and inverse singular values of compact linear operators in Hilbert space.
- ROUTLEDGE, N. A. Ordinal recursion.
- BARTLETT, M. S. Recurrence and first passage times.
- JAEGER, J. C. Conduction of heat in a solid with periodic boundary conditions, with an application to the surface temperature of the moon.
- CASSELS, J. W. S. Yet another proof of Minkowski's theorem on the product of two inhomogeneous linear forms.
- DEAN, W. R. The Green's function of an elastic plate.
- HINES, C. O. Generalized magneto-hydrodynamic formulae.
- SALAM, A. Fredholm solutions of partial integral equations.
- DAVENPORT, H. On the product of n linear forms.
- WILSON, A. H. The diamagnetism of quasi-bound conduction electrons.
- STRINGER, J. B. and WILKES, M. V. Microprogramming and the design of the control circuits in an electronic digital computer.

CONTENTS OF BIOLOGICAL REVIEWS

Vol. 28, Part 1. February 1953

- K. H. MANN. The segmentation of leeches.
- F. R. HARDEN JONES and N. B. MARSHALL. The structure and functions of the teleostean swimbladder.
- PHYLLIS M. STOCKDALE. Nutritional requirements of the dermatophytes.

CONTENTS

	PAGE
BONSALL, F. F. and GOLDIE, A. W. Algebras which represent their linear functionals	1
BONSALL, F. F. Core-preserving transformations of a vector space	15
EGGESTON, H. G. On closest packing by equilateral triangles	26
TAYLOR, S. J. The Hausdorff α -dimensional measure of Brownian paths in n -space	31
MACBEATH, A. M. On measure of sum sets. II. The sum-theorem for the torus	40
RANKIN, R. A. A problem concerning three-dimensional convex bodies	44
RANKIN, R. A. The anomaly of convex bodies	54
BARNES, E. S. Isolated minima of the product of n linear forms	59
OLLERENSHAW, KATHLEEN. On the region defined by $ xy \leq 1, x^2 + y^2 \leq t$	63
AULUCK, F. C. On partitions of bipartite numbers	72
WILKES, M. V. The use of a 'floating address' system for orders in an automatic digital computer	84
LITTLEWOOD, D. E. Conformal transformations and kinematical relativity	90
HAMILTON, J. Steady states and the S -matrix	97
DINGLE, R. B. The solution of the Schrödinger equation for finite systems, with special reference to the motion of electrons in Coulomb electric fields and uniform magnetic fields	103
LIDIARD, A. B. Overlapping energy bands and the theory of collective electron ferromagnetism	115
TER HAAR, D. The isotherms of an imperfect gas	130
SHERCLIFF, J. A. Steady motion of conducting fluids in pipes under transverse magnetic fields	136
URSELL, F. Mass transport in gravity waves	145
BINNIE, A. M. The stability of the surface of a cavitation bubble	151
RESEARCH NOTES:	
SAWYER, D. B. The number of non-homogeneous points in n -dimensional point sets	156
FARAHAT, H. On p -quotients and star diagrams of the symmetric group	157
SWINNERTON-DYER, H. P. F. Extremal lattices of convex bodies	161
COOKE, J. C. Some properties of Legendre functions	162
CASSELS, J. W. S. A short proof of the Minkowski-Hlawka theorem	165
MICHAEL, D. H. Stability of plane parallel flows of electrically conducting fluids	166
BUTLER, S. F. J. A note on Stokes's stream function for motion with a spherical boundary	169
