"We have experimentally proved that Listerine is a powerful antiseptic, preventing the development of bacteria and decomposition of vegetable infusions."—*British Medical Journal*, May 3, 1890.

LISTERINE

*A safe, non-poisonous, unirritating
antiseptic solution*

LISTERINE is particularly useful in the treatment of abnormal conditions of the mucosa, and admirably suited for a wash, gargle, or douche, in catarrhal conditions of the nose and throat.

LISTERINE in proper dilution may be freely and continuously used without prejudicial effect, either by injection or spray, in all the natural cavities of the body.

LISTERINE embodies a two-fold antiseptic effect, in that after the evaporation of its volatile constituents—thyme, eucalyptus, mentha, gaultheria, and ethyl alcohol—a film of boracic and benzoic acids remains upon the surface to which Listerine has been applied, affording more prolonged antiseptic protection.

LISTERINE is a trustworthy surgical dressing; it has no injurious effect upon the tissues in which the healing process is going on.

LISTERINE in teaspoonful doses will often afford relief in fermentative dyspepsia, and is largely prescribed, with excellent results, in the various forms of diarrhœa, occurring in infants and adults.

LISTERINE literature, including special pamphlets upon *Respiratory Diseases*, may be had, by physicians, upon application to

DISEASES OF THE

THROAT, NOSE, AND EAR

By **DAN MCKENZIE, M.D., F.R.C.S.E.**

Royal 8vo, pp. 662. Two Coloured Plates and many Illustrations in the text.
Price 42s. net.

The Prescriber.—"The book should be in the hands of every student and general practitioner, while some of the author's opinions will afford reflection even for experienced specialists in these departments."

The Medical Officer.—"The book gives exact information on the more modern methods associated with the speciality, and presents the more sound of the current views and opinions with which its author is in touch."

WILLIAM HEINEMANN (MEDICAL BOOKS) Ltd., 20 Bedford St., London, W.C.2.

CLINICAL INSTRUCTION

Clinical Instruction in the Diagnosis and Treatment of Disease is given daily in the Out-Patient Department from 2 to 5 p.m.; on Tuesdays and Fridays from 6.30 to 9 p.m. Major operations are performed at the times specified above, and minor operations by the Assistant Surgeons.

The Hospital contains 60 beds for In-Patients. There is also an Out-Patient attendance of over 60,000 yearly.

Practitioners and Medical Students are admitted to the Practice of the Hospital and from among them Clinical Assistants are chosen, whose duty it is to assist the member of the staff to whom they are appointed. For further information apply to the Dean—LIONEL COLLEDGE.

DISEASES OF THE NOSE AND THROAT

COMPRISING AFFECTIONS OF THE TRACHEA AND OESOPHAGUS

By Sir STCLAIR THOMSON, M.D., F.R.C.P.Lond., F.R.C.S.Eng.

"A complete, authoritative, and scholarly picture of modern Rhino-laryngology, beautifully illustrated and well arranged."—*Journal of Laryngology*.

"At once the fullest and clearest account of the diseases of the throat and nose that exists in the English language."—*British Medical Journal*.

"To the senior student it will be a reliable guide, and to the busy practitioner a complete and ready source of reference."—*Lancet*.

Trustworthy Serum

"P., D. & Co." ANTIDIPHThERIA SERUM is prepared under the most rigid precautions by highly qualified bacteriologists in the firm's own laboratories, which are officially inspected and licensed.

As an additional security, this serum is submitted to independent tests in the Pathological Laboratory of the University of Cambridge (Eng.), and there certified as to its antitoxin unit potency, its freedom from micro-organisms and from excess of antiseptic.

The serum is supplied in two grades, which differ only in the volume in which a given number of antitoxin units is contained. "Standard Grade" contains about 450 a. u. per c.c., and "Special Grade" contains from 900 to 1000 or more a. u. per c.c.

"STANDARD GRADE" ANTIDIPHThERIA SERUM (P., D. & Co.) is supplied in bulbs containing 2000 or 3000 a. u.

"SPECIAL GRADE" ANTIDIPHThERIA SERUM (P., D. & Co.) is supplied in bulbs containing 2000, 4000, 6000, or 8000 a. u.
