**Editor-in-chief**

C Borgemeister, *icipe*, Nairobi, Kenya

*International Journal of Tropical Insect Science* is the only journal devoted exclusively to the latest research in tropical and sub-tropical insect science. Each issue brings you original, peer-reviewed research findings on tropical insects and related arthropods, with special emphasis on their environmentally benign and sustainable management. The journal's scope includes biological diversity, ethnoentomology, biosystematics and environmental issues.

**Editor**

Lucy Tucker, Waiti Hill Ltd, New Zealand

*World's Poultry Science Journal* provides authoritative reviews in poultry science and an international forum for the exchange and dissemination of information including research, education and industry organisation. Each issue includes poultry industry related news, regional reports on global developments in poultry, reports from specialist scientific working groups, book reviews, association news and a calendar of forthcoming events.

**NEW - Digital Archive!**

Access from the first issue in 1945 until 2003 online!

# Notes for Authors

*Animal Health Research Reviews* provides an international vehicle for the publication of reviews and commentaries on all aspects of animal health. The Journal covers both infectious and non-infectious diseases in domestic and wild animals. Articles may be in-depth reviews of a specific aspect of a disease or pathogen, or may cover all aspects of a disease, but must include new findings or advance new concepts and hypotheses. The Journal publishes both solicited and unsolicited articles. Reviews will normally be 5000–6000 words in length. The Journal is also produced electronically and is available on the Internet. As a contributor you should note and follow the guidelines set out below.

**Refereeing.** All contributions are read by two or more referees to ensure both accuracy and relevance, and revision may thus be required before final acceptance. Authors are asked to submit the names and contact details (including E-mail address if available) of up to four potential referees for their paper. On acceptance, contributions are subject to editorial amendment to suit house style.

**Copyright.** Papers are accepted on the understanding that the work has been submitted exclusively to the journal and has not been previously published elsewhere unless otherwise stated. Authors will be supplied with a copyright form that must be completed and returned to the Publisher. It is the author's responsibility to ensure that permission has been obtained from the copyright owner to reuse any figures or illustrations from previously published work.

**Preparation of manuscripts.** You should write in clear and concise English. Spelling should follow Webster's American Dictionary. Authors whose native tongue is not English are assured that in-house editorial attention to their contribution will improve clarity to readers.

Manuscripts should be submitted in Word double line spacing with ample margins (at least 2.5 cm) on each side. Do not underline anything. Number every page. Italic should be used for Latin names of organisms and bold for headings. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. Upon acceptance, authors are requested to submit an electronic file of the final version of their paper.

## Arrangement of papers

1. Title page including the article title, author(s), affiliation(s), keywords and one author identified for correspondence (please include the full postal address, telephone and fax numbers, and an E-mail address where available).
2. An indicative abstract that should not exceed 200 words. A short title of up to 45 characters should be provided as a running head.
3. Keywords (between three and eight).
4. The text divided under appropriate headings.
5. Acknowledgements (if any).
6. References
7. Tables (at the end of the manuscript).
8. Legends to figures (group at the end of the manuscript).
9. Figures to be supplied as separate files.

**Tables.** Tables should be reduced to the simplest form, and should not be used where text or figures give the same information. They should be submitted at the end of the article. Each table must be accompanied by a clear and concise caption and must be cited in the text.

**Figures.** All figures must be cited in the text with appropriate captions supplied at the end of the manuscript after the References.

To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Each file must be clearly labelled, Fig 1 etc. Following these guidelines

will result in high quality images being reproduced in both the print and the online versions of the journal.

### Line artwork.

Format: tif or eps

Colour mode: black and white (also known as 1-bit)

Resolution: 1200 dpi

### Combination artwork (line/tone).

Format: tif or eps

Colour mode: grayscale (also known as 8-bit)

Resolution: 800 dpi

### Black and white halftone artwork.

Format: tif

Colour mode: grayscale (also known as 8-bit)

Resolution: 300 dpi

### Colour halftone artwork.

Format: tif

Colour mode: CMYK

**References.** References should follow the Harvard system. Give the surnames and initials of all authors. Give journal titles in full.

*Journal article.* Shibata I, Mori M and Uruno K (1997) Experimental infection of maternally immune pigs with porcine reproductive and respiratory syndrome (PRRS) virus. *Journal of Veterinary and Medical Science* **60**: 1–13.

*Book chapter.* Sanderson CJ (1999) Cytokines active on eosinophils. In: Makino S and Fukuda T (eds) *Eosinophils: Biological and Clinical Aspects*. Boca Raton: CRC Press, pp. 274–283.

*Book.* Dalton JP (1999) *Fasciolosis*. Wallingford: CABI Publishing.

Please ensure that references are complete and correct, i.e. that they include, where relevant, author name(s), article or book title, volume number, edition number, publisher, and page range.

**Proofs.** Correspondence and proofs for correction will be sent to the first named author unless otherwise indicated. The author will receive pdf proofs for checking, but only mostly errors of a typographical nature will be accepted. It is important that proofs be returned promptly. Authors may be charged for any alterations in excessive corrections.

**Offprints.** The main author will receive a complimentary PDF of the paper. Offprints may be ordered prior to publication.

## Submissions of manuscripts and correspondence

Three complete copies of the manuscript and artwork should be submitted to:

**Professor Carlton L. Gyles**  
**Ontario Veterinary College**  
**University of Guelph**  
**Guelph**  
**Ontario**  
**Canada N1G 2W1**

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

*Animal Health Research Reviews* – published by Cambridge University Press in collaboration with the Conference of Research Workers in Animal Diseases.

# Animal Health Research Reviews

Volume 11 December 2 2010

Biofilm formation in bacterial pathogens of veterinary importance <i>Mario Jacques, Virginia Aragon and Yannick D.N. Tremblay</i> . . . . .	97
Immune responses against Marek's disease virus <i>Payvand Parvizi, Mohamed Faizal Abdul-Careem, Kamran Haq, Niroshan Thanthrige-Don, Karel A. Schat and Shayyan Sharif</i> . . . . .	123
The role of porcine reproductive and respiratory syndrome (PRRS) virus structural and non-structural proteins in virus pathogenesis <i>Nedžad Music and Carl A. Gagnon</i> . . . . .	135
Duration of immunity induced by companion animal vaccines <i>James A. Roth and Anna Rovid Spickler</i> . . . . .	165
Bovine viral diarrhoea virus infections in heterologous species <i>Thomas Passler and Paul H. Walz</i> . . . . .	191
The development of oral fluid-based diagnostics and applications in veterinary medicine <i>John R. Prickett and Jeffrey J. Zimmerman</i> . . . . .	207
Epidemiology and horizontal transmission of porcine circovirus type 2 (PCV2) <i>A. R. Patterson and T. Opriessnig</i> . . . . .	217
Livestock pathology in the central African region: some epidemiological considerations and control strategies <i>Daniel Ndzingu Awa and Mbunkah Daniel Achukwi</i> . . . . .	235
