

Clay Minerals

VOLUME 10 · NUMBER 2 · DECEMBER 1973

CONTENTS

E. F. VANSANT and J. B. UYTTERHOEVEN. The adsorption of aromatic, heterocyclic and cyclic ammonium cations by montmorillonite	61
K. KIMBARA, S. SHIMODA and T. SUDO. An unusual chlorite as revealed by the high temperature X-ray diffractometer	71
B. S. KAPOOR. The formation of 2:1–2:2 intergrade clays in some Norwegian podzols	79
R. J. O. HAMBLIN. The clay mineralogy of the Haldon Gravels	87
R. E. BROCIENER and E. C. VOLLANS. Thickening flocculated kaolinite slurries in the nozzle discharge, multi-disc, bowl centrifuge	99
J. O. JACKSON. The alteration characteristics of the Lower Oxford Clay	113
Note	
N. YOSHINAGA, J. M. TAIT and R. SOONG. Occurrence of imogolite in some volcanic ash soils of New Zealand	127
Book Reviews	131
Corrigenda	134
